Biogenetic Paradoxes of the Nation Sakari Tamminen, 2019-11-22 In 1992 the Convention on Biological Diversity CBD signed by over 160 countries and hailed as the key symbol of a common vision for saving Earth's biodiversity set forth three primary mandates preserving biodiversity

using biodiversity components sustainably and enabling economic benefit sharing The CBD which gave signatory countries the ability to claim sovereignty over nonhuman genetic resources native to each nation defined biodiversity through a politics of nationhood in ways that commodified genetic resources In *Biogenetic Paradoxes of the Nation* Sakari Tamminen traces the ways in which the CBD's seemingly compatible yet ultimately paradox ridden aims became manifest in efforts to create conserve and capitalize on distinct animal and plant species In using Finland as a case study with which to understand the worldwide efforts to convert species into manifestations of national identity Tamminen shows how the CBD's policies contribute less to biodiversity conservation than to smoothing the way for frictionless operation of biotechnologically assisted circuits of the global bioeconomy Tamminen demonstrates how an intimate look at the high level politics and technical processes of defining national genetic resources powerfully illuminates the limits of anthropocentric biopolitical theory
