Advances on Mechanics, Design Engineering and Manufacturing V Cristina Manchado del Val, Ramón Miralbes Buil, Guillermo Peris Fajarnés, María Moncho Santonja, Caterina Rizzi, Lionel Roucoules, 2025-05-03 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering innovative design and computer aided design Further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and nautical engineering and construction aeronautics and aerospace design and modeling The book is divided into six main sections reflecting the focus and primary themes of the conference The contributions presented in this book will not only provide researchers engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work but also stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations

Deciphering Antimicrobial Resistance: Genetic Insights and Perspectives Massimiliano Lucidi, Valerio Baldelli, Mattia Pirolo, Daniela Visaggio, 2025-11-18 Antimicrobial agents form the essential shield behind which modern medicine operates However this shield is progressively weakening as antimicrobial resistance AMR escalates posing a serious global health threat that affects humans and animals The spread of AMR is fueled by multiple

factors including misuse and overuse of antimicrobials inadequate diagnostic practices and the plasticity of microbial genomes With antimicrobials being essential in medical care the rise of AMR jeopardizes our ability to combat common infections and increases the risks associated with routine medical procedures To address this issue it is vital to invest in research covering various aspects of AMR including the genetic mechanisms underlying resistance and its evolution and the surveillance of resistance and its spread in humans animals and the environment *Frontiers in Cellular and Infection Microbiology* aims to offer a comprehensive collection of articles delving into the genetic factors influencing AMR This collection covers a broad spectrum of subjects including but not limited to epidemiological monitoring of resistance prevalence in clinical veterinary and environmental settings designing genetic strategies to address or preclude AMR advancements in molecular diagnostic methodologies the identification of mechanisms of action for novel antimicrobial compounds and the exploration of novel mechanisms contributing to antimicrobial resistance Manuscripts will be selected primarily based on the novelty of research findings and scientific quality We invite contributors to submit articles in one of the following types Hypothesis and Theory Methods Opinion Review Original Research and Perspectives across the following primary areas i Analysis of AMR in the clinical veterinary and environmental settings ii Design of novel diagnostic tools to characterize AMR iii Identification and characterization of novel AMR mechanisms iv Investigation of the mechanisms of action for new antimicrobials v Generation of novel genetic platforms for the screening of new antimicrobial compounds vi Study of the regulatory networks controlling AMR

Public Relations Planning Edward T. Vieira, Jr.,Yulong Li,2024-06-10

Public Relations Planning A Practical Guide for Strategic Communication provides students with an in depth understanding of the steps involved in planning and executing a successful PR campaign Taking a strategic approach to the subject the authors bring years of practical experience to the project helping students see how theoretical elements fit together in reality and preparing them for the workplace At the same time the book goes beyond an introductory discussion of the theory of PR planning incorporating material from cutting edge research in the field This fully updated second edition explores current trends and consequences surrounding the COVID 19 pandemic covers the latest technological tools and techniques as well as the ever changing landscape of social media and examines the role of data analytics in the PR decision making process Examples and vignettes have been updated so that they reflect the current state of the global PR environment whilst learning objectives key term definitions and chapter exercises facilitate comprehension Providing a solid foundation to the PR planning process this text is core reading for advanced undergraduate postgraduate and executive education students studying Public Relations Strategy Public Relations Campaigns and Strategic Communications Online resources include PowerPoint lecture slides a test bank answers for end of chapter questions and instructor notes for the case studies *Public Relations Planning* is featured on the International Public Relations Association website [Remote Sensing Applications in Oceanography with Deep Learning](#) Muhammad Yasir,Shah Nazir,Chao Chen ,Weimin Huang,2025-10-30 *Remote sensing*

technology has revolutionized ocean exploration allowing researchers to monitor and understand various oceanographic processes and phenomena on a global scale. Remote sensing, which involves the use of satellites and aircraft to collect data about the planet's surface and atmosphere, enables scientists to monitor oceanic conditions in real time, track changes in sea level, and analyse marine ecosystems. Deep learning plays a pivotal role in enhancing remote sensing technology, revolutionizing how we collect, interpret, and utilize vast amounts of environmental data. By leveraging deep learning, remote sensing can identify subtle patterns and anomalies that traditional methods might miss, such as climate change impacts. Together, remote sensing and ocean exploration enhance our ability to protect marine environments, sustain biodiversity, and address global challenges like climate change and sustainable development. These advancements not only deepen our scientific knowledge but also inform policy decisions and conservation efforts, ensuring the health and resilience of the world's oceans for future generations.

This Research Topic compiles the latest research and developments in the application of remote sensing techniques, particularly using deep learning methods, to improve our understanding of the oceans. We invite original research articles, reviews, and case studies on the following topics:

- Advanced remote sensing techniques for ocean observation, including deep learning based approaches.
- Integration of satellite, aerial, and in situ data for oceanographic studies using deep learning.
- Machine learning and artificial intelligence algorithms optimized for ocean remote sensing.
- Hyperspectral and multispectral imaging for marine applications enhanced by deep learning techniques.
- SAR (Synthetic Aperture Radar) applications in oceanography with deep learning models.
- Remote sensing of coastal and estuarine environments using deep learning architectures.
- Monitoring of harmful algal blooms using deep learning algorithms applied to remote sensing data.
- Deep learning based approaches for remote sensing of coral reefs and marine habitats.
- Applications of deep learning in fisheries management utilizing remote sensing data.
- Deep learning based assessment of climate change impacts on oceans using remote sensing datasets.

Manuscripts relating to practical applications in ecological monitoring and marine target tracking can be submitted to the Research Topic "Remote Sensing Applications in Marine Ecology Monitoring and Target Sensing" (<https://www.frontiersin.org/research-topics/64528/remote-sensing-applications-in-marine-ecology-monitoring-and-target-sensing>).

Teaching Visual Culture by Kerry Freedman, This is an updated edition of the first book to focus on teaching visual culture. The author provides the theoretical and practical basis for developing a curriculum that lays the groundwork for art education at all levels (K-12 and higher education) and across school subjects. Drawing on material, social, cognitive, aesthetic, and curricular theories, Freedman offers a framework for teaching the visual arts from a cultural standpoint. Chapters discuss visual culture in a democracy, aesthetics in curriculum, philosophical and historical considerations, recent changes in the field of art history, connections between art, student development, and cognition, art inside and outside of school, the role of fine arts in curriculum, visual technologies, television as the national curriculum, student artistic production and assessment, and much more. New content includes applications of new materialism, ways to

document and assess tacit knowledge in students and uses of AI image generation Book Features Fourteen full color images new to the second edition Both documents and challenges past and current practices of art education for teacher educators K 12 teachers undergraduate and graduate students school administrators and community educators Provides a foundation for art education with ways to update curriculum an exploration of why newer technologies are making visual literacy essential for all learners and new ideas about the impact of aesthetics on learning Covers contemporary issues essential to addressing the increased impact of visual culture across school subjects including new brain research visual culture and the environment the relationship between the diversity of visual culture and identities and the visual culture of politics

Optimization and data-driven approaches for energy storage-based demand response to achieve power system flexibility Yue Xiang, Yingjun Wu, Luhao Wang, Zixuan Wang, Chenghong Gu, 2025-07-31 With the widespread adoption of distributed renewable energy and electric vehicles the power grid faces new challenges in ensuring stable and sustainable development Concurrently insufficient local consumption resulting from distributed generation also impacts the power grid's safe operation Energy storage and demand response play an important role in this context by promoting flexible grid operation and low carbon transition Electric vehicles beyond serving as mobile energy storage resources contribute to the grid by offering Vehicle to Grid V2G services through optimized charging and discharging scheduling Additionally on board batteries in electric vehicles provide energy storage functions for both home and business users In comparison to traditional loads flexible loads can be efficiently managed through demand response to optimize consumption patterns to meet grid needs Therefore the collaborative dispatching of multi modal energy storage integration technologies such as batteries pumped hydro storage hydrogen storage and distributed generators alongside diverse demand side flexible resources like flexible loads and electric vehicles holds significant importance The coordinated optimization of these distributed resources can effectively address the intermittency of variable renewable energies VERs encourage the adoption of flexible loads and enhance the overall adaptability and carbon emission reduction efforts of the power system The main objectives of this Research Topic are 1 Applying advanced optimization and or data driven methods for single joint scheduling of flexibility portfolio 2 Coordinating flexible storage generation load and EV resources to strengthen system operation 3 Leveraging coordinated demand flexibility to improve power quality and carbon performance 4 Mitigating impacts of VERs fluctuations through aggregated single multi modal storage and demand response 5 Developing and demonstrating innovative coordination market mechanisms and applications Topics to be covered include but are not limited to 1 Modeling and optimization of single multi modal storage demand systems such as distributed storage electric vehicles and flexible load 2 Technical and economic benefits assessments of coordinated flexibility solutions 3 Planning and real time operation of single joint flexibility resource dispatch 4 Coordination mechanisms and market design for single joint flexibility resource 5 Forecasting approaches for distributed storage electric vehicles and flexible load 6 Cybersecurity and resilience

enhancement of single multi flexibility systems 7 Applied research on field testing pilot projects and business models 8 Policy and regulatory frameworks for promoting flexibility resources development 9 Future trends and emerging technologies on storage and demand side integration Opportunistic pathogens: pathogenesis and multi-drug resistance mechanisms

Shicheng Chen,Lisheng Liao,Mingxi Wang,2025-04-17 The World Health Organization WHO has identified antimicrobial resistance AMR as one of the most critical global public health threats At least 4 95 million people death was caused by AMR in 2019 Even worse its potential economic impact is estimated to reach a staggering 100 trillion due to AMR in the next thirty years <https://www.who.int/health-topics/antimicrobial-resistance> Researching the development of antibiotic resistance and exploring ways to prevent detect and treat antimicrobial resistant infections have been prioritized in the medical microbiology field AMR mechanisms have been uncovered on many Enterobacteriaceae and Gram positive bacteria such as Enterococcus faecium and Staphylococcus aureus due to their clinical significance and diverse resistance mechanisms Unfortunately the opportunistic pathogens have been overlooked in the clinics because they are often identified as normal flora or common environmental organisms in human specimens Opportunistic pathogens may have low pathogenicity while they can often cause serious infections in immunocompromised patients and lead to outbreak in the healthcare settings They may even lead to diseases in healthy individuals if being introduced into hosts system by traumatization Management of such infections is often challenging due to the lack of guidelines standards for antibiotic susceptibility tests as well as multi drug resistance MDR Lately diseases linked to non pathogenic microorganisms are becoming more common under typical conditions such as Stenotrophomonas maltophilia *Elizabethkingia* spp *Acinetobacter baumannii* and many others
