**Analyzing Social Media Networks with NodeXL** Derek Hansen, Ben Shneiderman, Marc A. Smith, 2010-09-14

Analyzing Social Media Networks with NodeXL offers backgrounds in information studies computer science and sociology. This book is divided into three parts: analyzing social media, NodeXL tutorial, and social media network analysis case studies. Part I provides background in the history and concepts of social media and social networks. Also included here is social network analysis which flows from measuring to mapping and modeling collections of connections. The next part focuses on the detailed operation of the free and open source NodeXL extension of Microsoft Excel which is used in all exercises throughout this book. In the final part, each chapter presents one form of social media such as e-mail, Twitter, Facebook, Flickr, and YouTube. In addition, there are descriptions of each system, the nature of networks when people interact, and types of analysis for identifying people, documents, groups, and events. Walks you through NodeXL while explaining the theory and development behind each step, providing takeaways that can apply to any SNA. Demonstrates how visual analytics research can be applied to SNA tools for the mass market. Includes case studies from researchers who use NodeXL on popular networks like email, Facebook, Twitter, and wikis. Download companion materials and resources at <https://nodexl.codeplex.com>.

**Advances in Information Retrieval** Paul Clough, Colum Foley, Cathal Gurrin, Gareth Jones, Wessel Kraaij, Hyowon Lee, Vanessa Murdock, 2011-04-12. This book constitutes the refereed proceedings of the 33rd annual European Conference on Information Retrieval Research (ECIR 2011) held in Dublin, Ireland, in April 2010. The 45 revised full papers presented together with 24 poster papers, 17 short papers, and 6 tool demonstrations were carefully reviewed and selected from 223 full research paper submissions and 64 poster/demo submissions. The papers are organized in topical sections on text categorization, recommender systems, Web IR, IR evaluation, IR for Social Networks, cross language IR, IR theory, multimedia IR, IR applications, interactive IR, and question answering NLP.

**Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications** Gary Miner, 2012-01-11. The world contains an unimaginably vast amount of digital information which is getting ever vaster ever more rapidly. This makes it possible to do many things that previously could not be done: spot business trends, prevent diseases, combat crime, and so on. Managed well, the textual data can be used to unlock new sources of economic value, provide fresh insights into science, and hold governments to account. As the Internet expands and our natural capacity to process the unstructured text that it contains diminishes, the value of text mining for information retrieval and search will increase dramatically. This comprehensive professional reference brings together all the information tools and methods a professional will need to efficiently use text mining applications and statistical analysis. The Handbook of Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications presents a comprehensive how-to reference that shows the user how to conduct text mining and statistically analyze results. In addition to providing an in-depth examination of core text mining and link detection tools, methods, and operations, the book examines

advanced preprocessing techniques knowledge representation considerations and visualization approaches Finally the book explores current real world mission critical applications of text mining and link detection using real world example tutorials in such varied fields as corporate finance business intelligence genomics research and counterterrorism activities

University course Master's Thesis language English abstract When I took office only high energy physicists had ever heard of what is called the Worldwide Web Now even my cat has its own page Bill Clinton 1996 Only 20 years ago mostly big companies had access to the Internet in order to exchange information for the worldwide production and transfer of financial services The big change has come with new data based applications and an enlargement of broadband connections in the beginning of the 21th century It is now possible to provide bigger amounts of data in the Worldwide Web Nowadays the Internet is a platform where private users can enter personal contents and information Blogs and forums have become popular in everyday life In Germany 38% of the 1006 respondents older than 16 years are registered in online communities In the strongest group from 16 to 30 years even three out of four Internet users are members in those social networks according to the representative study Internet 2009 Wer macht was im Worldwide Web by PriceWaterhouseCoopers in Frankfurt am Westfalenblatt 27 28 June 2009 p 6 Web 2.0 applications have made a change in communication From the

passive one way communication of the Web 1.0 where users could online read information by experts to bi directional communication where people actively work on the contents of the pages. The Internet has become a social Web. Users with the same interests find each other and discuss everything they think about for examples about products. Instead of asking friends about their product experiences they use online communication platforms for the search and the exchange of information. In doing so a large variety of opinions for every kind of product can be found in the blogs and forums. Analyzing the electronic word of mouth communication is the direct way to customer opinions. Imagine you can overhear like a fly on the wall millions of people talking about your company your marketing concepts your advertisement and your products customers employees competitors partners and the media. Imagine further you could use these news for adapting perfectly on the customers wishes what you want how you want it. This and more provide blogs Wright 2006 p 20. It is important for every company to find out about the customer's attitude towards their products. Up to now companies have conducted classical marketing research surveys with paper or telephone interviews and focus groups. Multimedia Internet New Technologies grade 72% Distinction City University London School of Informatics and School of Arts and Social Sciences course MSc Information Communication and Society language English abstract This dissertation examines tweet content from key periods of the uprisings in Egypt and Syria of 2011 and 2012 generally known as the Arab Spring. Some authors and the main stream media have suggested that these uprisings were significantly influenced and organised by Twitter and subsequently referred to them as Twitter Revolution. Other authors have strongly opposed this idea and attributed it to self deception in the light of marvellous inventions of the Western World. They have suggested Twitter was predominantly used as an information sharing network. In an effort to contribute data to this debate this dissertation analyses tweet content from three different observation periods two tweet datasets were collected from other academics and third one was crawled from the Twitter API this process made use of the crawling tool cURL and the database software mongoDB. The combined tweet dataset contained about 1.9 million tweets out of which a sample of 1945 tweets was drawn. This sample was then evaluated in a quantitative content analysis according to a coding manual. These codes were entered into the statistical analysis software SPSS in which they were also processed. This study found that in the context of these uprisings Twitter was indeed used more as an information sharing tool and only to a relatively small fraction for organisational purposes. This result does not negate the possibility of a mobilising effect of that small fraction. A further central result is that almost every second tweet contained a hyperlink and that most of these lead to visual stimuli.
