**Neuropsychology of the Sense of Agency** Michela Balconi,2010-09-08 Not nothing without you but not the same Erich Fried 1979 How do I know that I am the person who is moving The neuroscience of action has identified specific cognitive processes that allow the organism to refer the cause or origin of an action to its agent This sense of agency has been defined as the sense that I am the one who is causing or generating an action or a certain thought in my stream of consciousness As such one can distinguish actions that are self generated from those generated by others giving rise to the experience of a self other distinction in the domain of action A tentative list of the features distinguishing the concept of agency includes awareness of a goal of an intention to act and of initiation of action awareness of movements a sense of activity of mental effort and of control and the concept of authorship However it remains unclear how these various aspects of action and agency are related to what extent they are dissociable and whether some are more basic than others Their sources remain to be specified and their relationship to action

specification and action control mechanism is as yet unknown      **Thinking about Oneself** Kristina Musholt,2015-07-17 A novel theory of self consciousness and its development that integrates philosophical considerations with recent findings in the empirical sciences In this book Kristina Musholt offers a novel theory of self consciousness understood as the ability to think about oneself Traditionally self consciousness has been central to many philosophical theories More recently it has become the focus of empirical investigation in psychology and neuroscience Musholt draws both on philosophical considerations and on insights from the empirical sciences to offer a new account of self consciousness the ability to think about ourselves that is at the core of what makes us human Examining theories of nonconceptual content developed in recent work in the philosophy of cognition Musholt proposes a model for the gradual transition from self related information implicit in the nonconceptual content of perception and other forms of experience to the explicit representation of the self in conceptual thought A crucial part of this model is an analysis of the relationship between self consciousness and intersubjectivity Self consciousness and awareness of others Musholt argues are two sides of the same coin After surveying the philosophical problem of self consciousness the notion of nonconceptual content and various proposals for the existence of nonconceptual self consciousness Musholt argues for a non self representationalist theory according to which the self is not part of the representational content of perception and bodily awareness but part of the mode of presentation She distinguishes between implicitly self related information and explicit self representation and describes the transitions from the former to the latter as arising from a complex process of self other differentiation By this account both self consciousness and intersubjectivity develop in parallel      *Catalogue of Printed Books* British Museum,1889      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965-70

Lightfoot,Pengliang Lu,Amy McHugh,Iris Moon,Annamarie Sandecki,Karen Stamm,Catherine D. Stergar,2021-07-06 Edward C Moore 1827-1891 was the creative leader who brought Tiffany Co to unparalleled originality and success during the late nineteenth century A silversmith designer and prodigious collector Moore sought out exceptional objects from around the world which he then used as inspiration for Tiffany's innovative silver designs This informative richly illustrated volume the first study of Moore's life collection and influence presents more than 170 examples from his vast collection ranging from Greek and Roman glass to Spanish vases Islamic metalwork and Japanese textiles These are juxtaposed with sixty magnificent silver objects created by the designers and artisans at Tiffany who were inspired by Moore's acquisitions Included among them are the world famous Bryant Vase drawing upon Greek examples a love cup featuring ornate Saracenic decoration and a chocolate pot

incorporating novel techniques influenced by Japanese ceramics and lacquerware. The illuminating texts have been enriched by groundbreaking research into contemporary sources such as newspapers and periodicals the Tiffany Co Archives and a newly identified technical manual and supervisor's diaries all of which provide an intimate look at the firm's design processes and Moore's role in shaping them. A valuable contribution to the history of American decorative arts Collecting Inspiration illuminates both the legendary Tiffany aesthetic and the legacy of a significant collector designer and entrepreneur of the Gilded Age. *Motor Sport* William Boddy, 1958      **BMJ**, 1991      Ward's Auto World, 1995      **Hi Fi/stereo Review**, 1985
