**The Palgrave Handbook on Cyber Diplomacy** George Christou, Wilhelm Vosse, Joe Burton, Joachim A. Koops, 2025-09-30 This Handbook offers a state of the art overview and comprehensive analysis of the emerging field of cyber diplomacy During the last twenty years a complex cyber ecosystem has been emerging that is increasingly challenged at various levels in different domains and by a variety of actors Core issues range from cyber dis information warfare and frequent cyberattacks on critical infrastructure to sophisticated cybercriminals penetrating systems for income or simply securing rights online Such challenges are not only of a strictly technical nature but have also important social economic legal and geopolitical implications This broad policy agenda can neither simply be addressed by states alone nor by traditional diplomats that practice or engage in negotiations over securing cyberspace whether this is in relation to regulations norms rules or indeed technologies that can provide security and preserve fundamental rights and freedoms on the Internet Developments in practice and in theory require more complex conceptualisation and understanding of cyber diplomacy of what it is of who practices it where and how The Handbook seeks to contribute to the wider question on how cyber diplomacy might have affected and changed the tools and approaches of diplomacy itself and might influence the study of diplomacy in the future

*Cyber Persistence Theory* Michael P. Fischerkeller, Emily O. Goldman, Richard J. Harknett, 2022 A bold re conceptualization of the fundamentals driving behavior and dynamics in cyberspace Most cyber operations and campaigns fall short of activities that states would regard as armed conflict In *Cyber Persistence Theory* Michael P Fischerkeller Emily O Goldman and Richard J Harknett argue that a failure to understand this strategic competitive space has led many states to misapply the logic and strategies of coercion and conflict to this environment and thus suffer strategic loss as a result The authors show how the paradigm of deterrence theory can neither explain nor manage the preponderance of state cyber activity They present a new theory that illuminates the exploitive rather than coercive dynamics of cyber competition and an analytical framework that can serve as the basis for new strategies of persistence Drawing on their policy experience they offer a new set of prescriptions to guide policymakers toward a more stable secure cyberspace
