consumer to consumer marketplaces where the platform operates as a middle man between two independent private parties have increased in popularity. However, since then a world without platform based businesses seems unimaginable as this business model affects all markets including B2B business to business and B2C business to consumer. Corporations like Amazon, Google, Facebook, and Alibaba are just a few of examples to illustrate the impact this business model created on everyday life. Especially to Millennials and Gen Z, these companies serve as an attractive labor source and their outputs are used by them on a daily basis. Although the impact of this business model is universal, there are cultural distinguishing factors regarding expanding these businesses among countries. The thesis at hand tries to investigate the cultural differences in expanding a platform based business in China and Russia.
