Napoleon's Guns 1792-1815 (1) René Chartrand,2003-02-19 As a young gunner Napoleon Bonaparte was trained in one of Europe's finest artillery arms Both the technological sophistication of their weaponry and the skill of their gunners was largely the result of the adoption of the system devised by one man Jean Baptiste Vaquette de Gribeauval Gribeauval's standardised system of parts and calibres allowed a degree of uniformity and sophistication in the French artillery that was unmatched throughout Europe and allowed Napoleon to inherit and develop an arm that could dominate the battlefield This volume covers the field artillery pieces of the system the 4 8 and 12 pdr guns light 1 pdr guns and mountain guns and later innovations such as the 6 pdr gun

**1792-1815** Kevin F. Kiley,2021-03-15 A comprehensive military history reference book exploring all aspects of the artillery used during the Napoleonic Wars Napoleon began his military career as an artillery cadet and artillery played a fundamental part in all his great battles Until the Napoleonic Wars artillery had been seen merely as a supporting arm to the infantry but Napoleon changed everything He massed his guns in huge batteries to blast holes in his opponent's line He even used the artillery to charge the enemy the gunners galloping up to the enemy to open fire at pointblank range Napoleon's opponents did not all follow suit choosing other tactical deployments As a result the Napoleonic era more than any that preceded or followed it was one of fascinating artillery maneuvers and critical actions that changed the course of many of the key battles As the Prussian Field Marshal Blucher once observed Against Napoleon you needed guns and lots of them The Napoleonic Wars was also a time of innovation with the introduction of shrapnel shells and military rockets This book will examine the artillery arms of all sides from muzzle to butt plate As well as the significant artillerymen of the period the scientists and innovators military and civilian individuals such as Robins Belidor Grieauval and his colleagues Maritz Liechtenstein and his collaborators as well as the du Teil brothers will all be examined as will the important battles and sieges significant memoirs and documents and artillery terms that soon became part of the military lexicon Written by the renowned historian Kevin F Kiley this will be the definitive book on the subject and will cover all aspects of artillery in the Napoleonic Wars This is a wonderfully complete induction into the details of Napoleonic Artillery As well as defining some of the archaic terms associated with the art of gunnery note point blank is not what we mostly believe it to be it provides background to the careers of the key characters in the science The book contains many excellent technical drawings to explain sketches and images to inform and data tables in the appendix to which to refer Overall it is an indispensable aid to understanding the artillery of the period Michael McCarthy battlefield guide **Austrian Napoleonic Artillery 1792-1815** David

Hollins,2003-05-20 The Austrian artillery of the Revolutionary and Napoleonic Wars was a creation of the renowned Lichtenstein system of the early 1750s This weight system produced a series of weapons of 3 6 and 12 pdr calibre along with 7 and 10 pdr howitzers In the 1780s they were joined by Cavalry artillery guns with their Wurst seats In 1811 Austria also began the establishment of rocket troops based upon the British invention whilst their heavy and siege pieces remained the

Henry, 2002 **Artillery of the Napoleonic Wars** Kevin F. Kiley, 2015 Napoleonic artillery can usually be divided into two types field or light artillery which was employed by the armies on campaign and in the field and siege or heavy artillery which was employed in siege operations and against opponents holding the fortresses against them While field artillery consisted of calibers up to and including 12 pounders light enough to keep up with an army on the march and in combat siege artillery was of the heavier calibers and intended as battering pieces which could destroy fortifications through bombardment Similar garrison artillery was mounted on different gun carriages and employed to counter the siege operations and siege artillery of the opposing forces Serving alongside the artillery men the engineer arm displayed its expertise in the various operations needed to take or defend a fortress Naval artillery would along with the skill and seamanship of the naval officers and ratings who worked the ships determine who would be victorious at sea Naval guns were generally of two types guns and carronades and ranged in caliber from relatively small 9 pounders to 32 pounders for guns and even larger calibers for the short ranged and deadly carronades This volume chronicles the story of the guns and men during the twenty three years of almost continuous warfare from 1792 1815 from the battlefields of continental Europe to the almost primitive terrain of North America and of the seas lakes and rivers that connected them **Artillery Equipments of the Napoleonic Wars** Terence Wise, 1979-11-08 In the first half of the 18th century the French had been the European leaders in artillery possessing the only standardized range of pieces These pieces were sturdy but extremely heavy This book shows how at the beginning of the Seven Years War 1756 1763 Austria seized the lead by introducing new light field pieces the 3pdr 6pdr and 12pdr guns and some excellent light howitzers Other powers adopted this new system however no complete overarching methodology existed until the implementation of the Gribeauval system which was to

revolutionise the artillery of Europe and make possible the highly efficient field artillery of the Napoleonic Wars 1799 1815

**British Napoleonic Field Artillery** C.E. Franklin, 2012 This beautifully illustrated guide by master draughtsman and Napoleonic expert Carl Franklin draws together extensive research and previously unpublished information to provide a new insight into the field artillery and uniforms of the Napoleonic Wars. The evolution of this new form of artillery is shown in full detail for the first time and its use is fully examined. Particular attention is given to the ammunition drills, harness, supporting equipment and uniforms of the period and each type of field artillery is fully illustrated. If Napoleon himself proclaimed is everything, the rest does not matter. British Napoleonic Field Artillery helps to test the veracity of that statement and is an essential reference for all those interested in Napoleonic history. The Emperor Napoleon's New System of Field Artillery, as Submitted to the French Service by Captain Favé, and Translated by W. H. Cox Ildéphonse FAVÉ (General.), 1854

**British Napoleonic Artillery 1793-1815 (2)** Chris Henry, 2003-02-19 Following on from the first volume covering British Napoleonic Artillery, this volume concentrates on the heavy weapons of siege and coastal defences. This book covers the main equipments used: the 24 pounder siege gun and a variety of mortars. Mortars varied from 4 or 5 inch versions up to a 13 inch calibre and were considered to be extremely effective because they used an exploding shell to destroy fortifications or personnel. Also covered in detail is the specialist bomb vessel which was used to attack fortifications in a similar fashion, siege techniques and the tactical use of siege and coastal artillery.
