With the Chinese government's strategic aim to increase the share of gas in the energy mix from 5.8% in 2014 to 10% and 15% in 2020 and 2030 respectively the book outlines how China can achieve its gas targets. Providing both quantifiable metrics and policy measures for the transition it is a much needed addition to the literature on Chinese energy policy. The research and the resulting recommendations of this study have fed directly into the Chinese government's 13th Five Year Plan and provide unique insights into the Chinese government and policy making. Due to its global impact the book is a valuable resource for policy makers in both China and the rest of the world. *OECD Economic Surveys* OECD, OCDE, 2015

Do We Really Know China? Iris Efthymiou-Egleton, 2016-06-23. Different cultures and civilizations have different perception of a history context and ideas. The Greek philosophers Socrates, Plato, Demosthenes, Aristotle etc shaped Western thought, Western logic and built our thought systems. Nowadays we need historical pluralism and to form a cohesive whole especially in an increasingly multipolar world. It is said that Western people from a European philosophical perspective are only capable of addressing alternate philosophies using our own mindset. China historically saw its civilization as self evident, universal and did not feel the need to justify this in European terms. Despite the difficulties in comparing different cultures and civilizations this text summarizes the influence between China and the West. China's soft power as well as the current situation of China and its way up the global ladder of power. The concept of Chineseness and the identity with the Sinosphere, a brief presentation of China's history, geopolitical influences and industrial aspects, the foundation of Chinese thought, language and writing system as well as technological achievements, traditional medicine, arts and cuisine are only some of the topics covered in the next pages. In addition more subjects are analyzed that provide an overview of the current global position of China, the country's efforts for reform and global influence as well as its future potentials. These subjects don't fall far from discussing various economic and industrial facts like the integration of Chinese and European renewable energy markets, the made in China phenomenon, foreign policy and the country's position as a rising aid donor. After reading this book it should become obvious that China sees herself as Chung Kuo that means the Middle Kingdom, the centre of the universe and the world's oldest culture and society. So one could say that this is what they are trying to do so they can make their country again the centre of today's world. But during their rise which they characterize as peaceful they need to maintain global balance and escape from potential unpleasant events for example one could think of an analogy of US-China relations and the Thucydides trap. It seems so far that all the odds are with them their soft power in combination with political strategies, their ability to evolve and follow global trends in addition with a huge internal market brought China to its position today. But will China hold this place? Will the country rise to world's number one and in China's way to global dominance are we expected to see any more reforms? It seems that all these are in the hands of the Chinese. [Latin American Economic Outlook](#) Organization for Economic Cooperation and Development, 2015.
