Philpot,2007 ABSTRACT Van der Ryn and Cowan defined ecological design as any form of design that minimizes environmentally destructive impacts by integrating itself with living processes Ecological design principles EDPs support various forms for approaching this integration process and can be divided along a spectrum ranging from weak to intermediate to strong Weak ecological design seeks mitigation of humanity s environmental impact Intermediate ecological design attempts an integrative relationship between society and nature Strong ecological design is based in a belief that human systems can be functionally modeled after ecological structure and function Weak ecological design is limited in its capacity for sustainable change and strong ecological design is prohibitively stringent for widespread application The main problem approached here is the overabundance of ecological design principles that can be confusing incomplete or incorrect Our research qualitatively identifies what fundamental principles exist in ecological design and proposes a complex adaptive ecological design Further ecological design heuristics were developed to refine the field of ecological design in order to limit confusion promote its use and provide a basis for future research     **EcoDesign Implementation** Wolfgang Wimmer,Rainer Zust,Kun-Mo Lee,2004-10-20 Stakeholders such as environmental directives and customer demands for reducing environmental impacts of a product require innovative and environmentally improved products Therefore a systematic approach and effective methods and tools are needed in the early phase of product development The basic elements for optimized process management in the design department are described in this book The book provides twelve easy to follow steps for implementing ECODESIGN in a company It gives clear advice how to integrate environmental considerations into product design and development and combines ECODESIGN with Life Cycle Assessment and Environmental Communication Chapters on Product modeling Life Cycle Assessment ECODESIGN tasks Product Improvement and Environmental Communication use the previously developed ECODESIGN PILOT www ecodesign at pilot and show its application to a real product example The book comes with two web tools one is the ECODESIGN PILOT used to find measures to environmentally improve a product within a short time The other is the ECODESIGN PILOT s Assistant www ecodesign at assist an expert system which helps to find the right improvement strategy for a product Audience This book will be of interest to environmental and sustainability managers engineers in research and product development to designers environmental experts and consultants as well as to students working in this field     *Integrating Design, Ecology, and*
