An Introduction to the Making of Western Art Susan L. Green, 2024-03-29 This book is the first introduction to Western art that not only considers how choice of materials can impact form but also how objects in different media can alter in appearance over time and the role of conservators in the preservation of our cultural heritage The first four chapters cover wall and easel paintings sculpture drawings and prints from the late Middle Ages to the present day They examine with numerous examples how these works have been produced how they might have been transformed and how efforts regarding their preservation can sometimes be misleading or result in controversy The final two chapters look at how photography new techniques and modern materials prompted innovative ways of creating art in the twentieth century and how the rapid expansion of technology in the twenty first century has led to a revolution in how artworks are constructed and seen generating specific challenges for collectors curators and conservators alike This book is primarily directed at undergraduates interested in art history museum studies and conservation but will also be of interest to a more general non specialist audience

 Eva Nyström, 2009 This study employs as its primary source a codex from Uppsala University Library Codex Upsaliensis
 Graecus 8 Its aim is to contribute to a better understanding of the Late Byzantine and post Byzantine miscellaneous book It is
 argued that multitext books reflect the time and society in which they were created A thorough investigation of such books
 sheds light on the interests and concerns of the scribes owners and readers of the books Containing some ninety texts of
 different character and from different genres Codex Upsaliensis Graecus 8 is a complex creation but still an example of a
 type of book that was common during the Middle Ages and the Renaissance This study takes a comprehensive view of the
 book in its entirety making sense of its different parts in relation to the whole with the help of codicology and textual analysis
 With that approach the original idea of the book is brought to the fore and the texts are studied in the same context that the
 main scribe Theodoros chose and the early owners and readers of the book encountered Through a systematic codicological
 analysis the overall structure of the codex is explored and suggestions are made concerning the provenance The examination
 of the scribal work procedure becomes a means to profile this otherwise fairly unknown scribe The texts are grouped and
 characterized typologically to illustrate connections throughout the whole book as well as in relation to the separate

structural units The role of micro texts and secondary layers of inscription is also considered From the perspective of usability the texts are divided into four categories narrative texts rhetorical texts philosophical theological texts and practical texts Three texts are studied in greater depth as examples of the width of the scribe's interests and the variety of the book's contents Conservation of Cultural Property in India Indian Association for the Study of Conservation of Cultural

Italian Renaissance Drawings Hugo Chapman,2010 The Renaissance was a ground breaking period in the history of drawing Drawing became an art form in its own right rather than just being used in the preparation of other works of art Prior to 1400 few drawings survive and it is only in the fifteenth century that we can gain an understanding of how and why artists drew The reasons for this are threefold the growth in paper production meant it became more economical to draw the demand by patrons for originality necessitated artists make more studies to explore new compositional ideas and poses and finally a widening interest in collecting meant that drawings were preserved Drawing was an integral part of how Renaissance artists were trained Thanks to this education artists were able to express their ideas with extraordinary fluency on paper The spontaneity and rawness of many of the drawings in this arresting book reveal the minds and working practices of the artists The use of a variety of drawing tools from red chalk to silverpoint shows how expressive a medium drawing could be *Michelangelo, Drawing, and the Invention of Architecture* Cammy Brothers,2008 Michelangelo's fame as a painter and sculptor tends to eclipse his reputation as an architect but his impact here was just as profound In this book Cammy Brothers takes an unusual approach to Michelangelo's architectural designs arguing that they are best understood in terms of his experience as a painter and sculptor By following the steps by which Michelangelo arrived at his extraordinary inventions the author questions conventional notions of spontaneity as a function of genius Rather she explores the idea of drawing as a mode of thinking using its evidence to reconstruct the process by which Michelangelo arrived at new ideas By turning the flexibility and fluidity of his figurative drawing methods to the subject of architecture Michelangelo demonstrated how it could match the expressive possibilities of painting and sculpture
