[Applications of Big Data and Artificial Intelligence in Smart Energy Systems](#) Neelu Nagpal, Hassan Haes Alhelou, Pierluigi

Siano, Sanjeevikumar Padmanaban, D. Lakshmi, 2023-09-29 In the era of propelling traditional energy systems to evolve towards smart energy systems including power generation, energy storage systems and electricity consumption have become more dynamic. The quality and reliability of power supply are impacted by the sporadic and rising use of electric vehicles, domestic loads and industrial loads. Similarly, with the integration of solid state devices, renewable sources and distributed generation, power generation processes are evolving in a variety of ways. Several cutting edge technologies are necessary for the safe and secure operation of power systems in such a dynamic setting, including load distribution automation, energy regulation, control and energy trading. This book covers the applications of various big data analytics, artificial intelligence and machine learning technologies in smart grids for demand prediction, decision making processes, policy and energy management. The book delves into the new technologies for modern power systems such as the Internet of Things, Blockchain for smart home and smart city solutions in depth. Technical topics discussed in the book include Hybrid smart energy system technologies, Smart meters, Energy demand forecasting, Use of different protocols and communication in smart energy systems, Power quality and allied issues and mitigation using AI, Intelligent transportation, Virtual power plants, AI based smart energy business models, Smart home solutions, Blockchain solutions for smart grids.
