Tesla Model Injury Report Today:

Unsettled Topics Concerning Automated Driving Systems and the Transportation Ecosystem Rahul Razdan, 2019-11-05

Over the last 100 years the automobile has become integrated in a fundamental way into the broader economy. A broad and deep ecosystem has emerged and critical components of this ecosystem include insurance, after market services, automobile retail sales, automobile lending, energy suppliers e.g. gas stations, medical services, advertising, lawyers, banking, public planners and law enforcement. These components which together represent almost 2 trillion of the U.S. economy are in equilibrium based on the current capabilities of automotive technology. However, the advent of autonomous vehicles (AVs) and technologies like electrification have the potential to significantly disrupt the automotive ecosystem. The critical cog governing the rate and pace of this shift is the management of the test and verification of AVs. In this SAE EDGE report, six senior industry leaders in the impacted ecosystems essay articles which describe sectors of the current automotive ecosystem and the manner in which AV technology can potentially reshape them, providing a mosaic of the massive infrastructure shifts which will be required to absorb AV technologies. NOTE: SAE EDGE Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of interest to the mobility industry. The goal of SAE EDGE Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues. SAE EDGE Research Reports are not intended to resolve the issues they identify or close any topic to further scrutiny. The Promise and Peril of AI and IA Ted Peters, 2023-12-31

How should public theologians and social ethicists assess, anticipate, and amend the projected path taken by Artificial Intelligence and Intelligence Amplification? With the advent of generative AI along with large language models, suddenly our techie whiz kids are sounding the fire alarm. Will a Frankenstein monster escape its creator's design? Will more highly evolved superintelligence render today's human race extinct? Is this generation morally obligated to give birth to a tomorrow in which we, outdated humans, can no longer participate? This book collects foresighted analyses and recommendations from computer scientists, neuroscientists, AI ethicists, along with Christian and Muslim theologians.

Aerospace Medicine and Biology, 1979. A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports, STAR, and International aerospace abstracts, IAA.
