**Machine Learning Approach to Identifying an Edge in NBA Betting Markets** Guy Dotan,2020 With the recent rise of sports analytics legalization of sports gambling and increase in data availability to the everyday consumer the opportunity to close the gap between the bettor and the casino appears more attainable than ever before Our hypothesis was that one could build a model capable of exploiting the inherent inefficiencies that might exist within the betting marketplace Part one of this study required a derivation of the mathematics behind betting odds to determine the true probability a sportsbook places on the outcome of a matchup Integral to this analysis was to factor in the casino s always included cut of the betting pool known as the vig that are baked into all wagers to maximize profits Part two was the model building process in which we trained on an archive of team level NBA box scores dating back to 2007 in order to predict which team in the matchup would win or lose We aggregated our pace adjusted box score metrics using two different methodologies rolling eight game spans and accumulated year to date statistics and then applied these datasets to four different modeling implementations logistic regression random forest XGBoost and neural networks Our results were optimistic as all models were able to accurately predict the winner of a matchup at a rate of greater than 60% thus outperforming random chance The final part of this research involved seeing how our best model faired versus the real world betting lines for the 2019 20 NBA season We used our logistic model to get a win probability for each team in every matchup and compared that result to the probability as defined by the sportsbook odds This betting edge the discrepancy between our model and the sportsbook was used in a variety of betting strategies Using our best fixed wagering technique we were able to generate a return on investment of about 5% over the course of the entire season Using a more complicated wagering method known as the Kelly criterion a strategy that adjusts the amount of money wagered based on the size of the edge identified we were able to almost double

our investment with a return of about 98% In summary building a betting model to gain a gambling edge was determined to be quite achievable      Make money with sports betting 1 Lorenz Laplace,2021-10-15 Since 2019 this book exists in German now finally the English translation of this Buyer exists Lorenz Laplace succeeded in gaining a fortune of 20 000 EUR quite systematically through sports betting within three years with 1 000 EUR starting capital and many small bets with stakes of 20 50 EUR Laplace gives tips in easy to remember rules For example the main betting rule the tax favourites rule or the crass outsider rule The derivation of these tips is done in an understandable way and the calculations are very easy to follow The core of his strategy for betting is based on the following insight the probabilities for a sporting event cannot be calculated exactly So every betting provider errs in setting the odds Some odds are too low others are too high for the outcome It is only necessary to recognise in which direction the betting provider errs e g in favour of the underdog or the favourite The bettor's error is analysed with the help of a four point plan and then the bets are placed naturally on the events that have received odds that are too high from the bettor In addition Lorenz Laplace gives other decisive tips e g how to optimally integrate promotions Deposit bonuses free bets cashback or combination bet insurance etc The book is a must for every betting enthusiast who wants to make long term profits with betting      Betting Systems for All Major Sports Ken Osterman,2018-10-27 This book contains systems and angles for all four of the major sports in the United States Professional football basketball hockey and baseball are all covered In addition college basketball and college football are covered Some of these are easy to use angles but others are more complex systems that form a strong foundation for sports handicapping that can be improved upon by smart handicappers These systems are The Quick Line Method NFL The Underdog Advantage MLB The Road Dog Method NHL The Point Spread Overlay Method NBA and The Betting Odds Analysis Methods for college basketball and college football These systems have been developed and used successfully by Ken Osterman at race and sports books throughout Las Vegas The rules for each system are clearly explained so it is understood why they work Tips for improving these systems are also provided The following is the complete list of angles and systems NFL Football The Injured Star NFL Football The Hat Trick NFL Football The Quick Line Method NFL Football Calculating Over and Under Baseball The AAA Surprise Baseball The Underdog Advantage NHL The Road Dog Method NBA Basketball The Point Spread Overlay Method College Basketball The Betting Odds Analysis Method College Football The Betting Odds Analysis Method Appendix Mistakes to Avoid About the Author Ken Osterman has been developing systems methods and angles for a wide range of gambling games and sports wagering activities for more than 25 years and successfully applying them at various casinos and sports books He spends his time writing and playing his favorite systems in casinos and sports books throughout his hometown of Las Vegas Nevada      **Pro Basketball Handbook for Points spread Winners** Pat Duffy,2020-11-13 The only textbook for beating the NBA points spread of its kind The textbook format lays out an organized step by step approach to isolate NBA points spread plays with increased chances of beating the NBA points spread If you currently bet or want to bet on

NBA games this book is written for you If you are tired of losing more bets than you win and are frustrated at the many sports betting guides that only offer general advice about beating the spread without actually showing you how to do it this book is written for you Advances sports betting from a game of chance to a game of skillThe book unveils the hidden secrets behind a professional handicapping approach Reveals what NBA stats and data are truly relevant in beating the NBA pointspreadWorksheets are prepared and ready to use to guide the handicapping effortAvoids the traps inherent with calculating power ratings or identifying coincidental betting trendsUncovers the knowledge behind when to back or fade NBA teamsTeaches how to manage the unpredictability of the performance of NBA teams Stresses uneducated gambling promotes losing consequences and educated gambling is the best preventionOffers specific betting and money management strategy Explains the betting odds to prevent placing bad betsDispels the profitability perception of parlays and teasersTurns the betting effort into an informed expectation with a real upside and a controllable downside
