**Applications of Geomatics in Civil Engineering** Jayanta Kumar Ghosh,Irineu da Silva,2019-06-19 This book comprises select proceedings of the First International Conference on Geomatics in Civil Engineering ICGCE 2018 This book presents latest research on applications of geomatics engineering in different domains of civil engineering like structural engineering geotechnical engineering hydraulic and water resources engineering environmental engineering and transportation engineering It also covers miscellaneous applications of geomatics in a wide range of technical and societal problems making use of geospatial information engineering principles and relational data structures involving measurement sciences The book proves to be very useful for the scientific and engineering community working in the field of geomatics and geospatial technology

*Cyclonic Disasters and Resilience* Ashutosh Mohanty,Anupama Dubey,R. B. Singh,2022-04-19 The Bay of Bengal is prone to tropical cyclones and storm surges as a result of its location and many of the mostly poor people living along the coastal regions of South Asia lose their lives almost every year These disasters have been particularly devastating and have caused serious damage During the past five decades the low lying coastal and offshore islands have experienced a tragic history of 50 severe cyclones and storm surges with more than one million victims dead or missing People accepted and waited for the next disaster as they had no alternatives Members of the poor families who survived the disasters experienced hard times recovering from damage and the loss of their loved ones After disasters epidemic diseases arise in the affected areas Many of the people in distress are also deprived of public services Providing all sorts of assistance and emergency health preparedness are most essential to overcome such a situation The causes of these huge casualties have been mainly 1 the high population density of costal settlements 2 inadequate cyclone shelters in the disaster risk areas 3 lack of awareness of the disaster risk by the vulnerable population 4 deterministic attitudes of people who accept disasters as fate 5 houses that are weakly constructed and 6 underdeveloped central awareness programmes and weather forecast systems This book is based on an empirical study presenting a timeline analysis of major cyclones and their impacts and consequent losses through the super cyclones in the disaster prone coastal regions of India Sri Lanka and Bangladesh This study also investigates resilience mechanisms based on early warning systems technology applications including GIS and remote sensing best practices success stories and case studies that can be used for effective cyclone management and development of a resilience mechanism among coastal communities

*Odisha ,2012 101 Inequalities Amid the COVID-19 Crisis and Beyond* Ali Cheshmehzangi,Tong Zou,2025-10-18 This book presents 101 inequalities categorized across three tiers each illustrating how disparities manifest and persist The first tier focuses on contextual factors exploring inequalities in economic political and societal dimensions The second tier examines baselines analyzing inequalities related to timing season e g inequality of opportunity and natural environment space location e g geographical location and external environment and human condition e g age gender and ethnicity The third tier investigates the tangibles materials and resources assessed

through four key categories availability awareness accessibility and utility By examining these through global case studies authors not only validate the systemic and non systemic inequalities of our contemporary society but also propose pathways toward truly just inclusive and people centric sustainable development Authors hope this book sparks transformative thinking and action against the entrenched inequalities shaping our world While authors may have drifted away from the vision of just and inclusive societies the authors must find their way back toward a future where equity is not a privilege but a fundamental right More than just an academic discourse this book is a call to action particularly for the next generation those who seek to dismantle systemic inequalities and build sustainable futures for the many rather than just the privileged few or the bliss of the affluent minority

**Computational Intelligence in Data Mining** Himansu Sekhar Behera, Janmenjoy Nayak, Bighnaraj Naik, Ajith Abraham, 2018-07-03 The International Conference on Computational Intelligence in Data Mining ICCIDM after three successful versions has reached to its fourth version with a lot of aspiration The best selected conference papers are reviewed and compiled to form this volume The proceedings discusses the latest solutions scientific results and methods in solving intriguing problems in the fields of data mining computational intelligence big data analytics and soft computing The volume presents a sneak preview into the strengths and weakness of trending applications and research findings in the field of computational intelligence and data mining along with related field

Avoidable Deaths Nibedita S. Ray-Bennett, 2017-09-04 This book addresses one of the most fundamental questions of the 21st century why deaths continue to occur in natural disasters despite the tremendous advancements in disaster management science and weather forecasting systems increased sophistication of human built environments and ongoing economic and policy development worldwide By presenting an interdisciplinary tool for analysing systems failure the book provides concrete suggestions on how deaths may be reduced in resource poor contexts It goes beyond traditional risk and vulnerability perspectives and demonstrates that deaths in disasters are complex problems that can be solved by adopting a socio technical perspective to improve current disaster management systems in the developing world The book is a timely contribution as it directly addresses Global Target One of the UN s Sendai Framework for Disaster Risk Reduction which has urged 185 UN Member States to reduce disaster mortality by 2030 Further it offers a valuable resource for students researchers policy makers and practitioners interested in disaster risk reduction human rights gender sociology of risk crisis and disasters environmental science organisation and management studies

Panchayats and Rural Development in India Indian Institute of Public Administration. Members' Annual Conference, 2013 Section 1 All India perspectives section 2 State specific expositions

*Mapping Power* Navroz K. Dubash, 2018-08-22 Electricity is critical to enabling India s economic growth and providing a better future for its citizens In spite of several decades of reform the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance To understand why Mapping Power provides the most comprehensive analysis of the political economy of electricity in India s states With chapters on fifteen

states by scholars of state politics and electricity this volume maps the political and economic forces that constrain and shape decisions in electricity distribution. Contrary to conventional wisdom it concludes that attempts to depoliticize the sector are misplaced and could worsen outcomes. Instead it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards. These arguments have implications for the challenges facing India's electricity future including providing electricity to all implementing government reform schemes and successfully managing the rise of renewable energy.

Negotiating Marginality Mahana Rajakishor, 2019-03-01. Providing a critical ethnography of five different tribal movements fighting against the mega industrialization projects in Odisha, India, the book presents a thick description of the confrontation of the tribals to the authoritative forces of state domination. This confrontation a counter hegemonic discourse is neither antagonistic to change nor anti to development but rather in fact the author argues that the tribals are the subaltern citizens who aspire for not only more material and economic prosperity but also freedom from domination and deprivation. The book therefore seeks to answer one important question: how do the tribals appropriate marginality in their everyday lives in challenging domination and celebrating their desires, wishes, anticipations and material prosperity as well as in coping with the ruins of frustration and suffering. Drawing on long term ethnographic fieldwork carried over a decade (2006-16) this book provides empirical evidences and conceptual explorations on the resistance of subaltern citizens against domination. The author challenges current theories of social movements which claim that a cultural critique of the development paradigm is writ large in the political actions of those marginalized by development: tribals who lived in harmony with nature combining reverence for nature with the sustainable management of resources. On the other hand questioning the established notion of marginality as a problem, the author re-visits marginality as a possible site that nourishes the capacity of the tribals to resist and to imagine and create a new world. The complexity of tribal politics then cannot be reduced to an opposition between development and resistance. The book therefore persuades us to re-examine the politics of representation within the ideology of progressive movements. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.
