[Attachment Transmission in Wireless Networks](#) Lu Wang,Kaishun Wu,Mounir Hamdi,2014-07-08 This brief presents the novel PHY layer technique attachment transmission which provides an extra control panel with minimum overhead In addition to describing the basic mechanisms of this technique this brief also illustrates the challenges the theoretical model implementation and numerous applications of attachment transmission Extensive experiments demonstrate that attachment transmission is capable of exploiting and utilizing channel redundancy to deliver control information and thus it can provide significant

support to numerous higher layer applications The authors also address the critical problem of providing cost effective coordination mechanisms for wireless design The combination of new techniques and implementation advice makes this brief a valuable resource for researchers and professionals interested in wireless penetration and communication networks

Energy Efficiency in Communications and Networks Sameh Gobriel,2012-04-04 The topic of Energy Efficiency in Communications and Networks attracts growing attention due to economical and environmental reasons The amount of power consumed by information and communication technologies ICT is rapidly increasing as well as the energy bill of service providers According to a number of studies ICT alone is responsible for a percentage which varies from 2% to 10% of the world power consumption Thus driving rising cost and sustainability concerns about the energy footprint of the IT infrastructure Energy efficiency is an aspect that until recently was only considered for battery driven devices Today we see energy efficiency becoming a pervasive issue that will need to be considered in all technology areas from device technology to systems management This book is seeking to provide a compilation of novel research contributions on hardware design architectures protocols and algorithms that will improve the energy efficiency of communication devices and networks and lead to a more energy proportional technology infrastructure *Advanced Mimo Systems* Kosai Raoof,Huaibei Zhou,2009
