Volume highlights include discussions of multiple connotations of the Anthropocene landscapes as a link between climate and humans, synoptic approaches to explore large scale cultural patterns, regional studies for contextualizing cultural complexity and environmental determinism and social theory. Straddling the fields of Earth sciences, anthropology and archaeology and presenting research from across several continents, *Climates Landscapes and Civilizations* will appeal to a wide readership among scientists, scholars and the public at large. *Films and Other Materials for Projection* Library of Congress, 1974
