International Academy of Medical Acupuncture Case Studies

Case Number: 14

Patient Initials: JSW

Initial Date of Patient Consult/Treatment: January 13th, 2004

Patient Age: 43 Gender: Female Occupation: Office Manager

Subjective Patient Complaints: Adult onset asthma- Dyspnea, cough and occasional wheezing symptoms upon increased physical exertion/ exercise or "stress" situations

Onset: Three years ago insidiously, although after thorough questioning of the patient she revealed that she had lost a beloved pet and experienced much grief.

What palliates/provokes the symptoms? Provoked by exercise, emotional/physical Stress, cigarette smoke, mold, and also worse with seasonal respiratory allergies. Acute dyspnea and asthma symptoms temporarily eased with prescription bronchial inhaler medication.

Quality of symptoms: Bronchial spasm creating difficult expiration; a sensation of tightness in the chest, occasional wheezing symptoms. This patient states that on a scale of 1-10, where 10 is the best, she rates her symptoms as a three, due to the amount of interruption and disturbance to her normal daily routine.

Is there any radiation of symptoms? The dyspnea, wheezing and cough often causes neck and upper back soreness and stiffness, "tightness" sensation in chest, and occasional sore throat from the forceful coughing.

Describe the site of symptomatology: Bronchial, Lung, Chest/ Thoracic region

Time of day/ duration of symptoms: Daily episodes of dyspnea. Symptoms often worse @3-5 AM causing patient to awake coughing. Patient reports having to use medication (bronchial inhaler) at least 3-4 times a day typically associated with the above mentioned stressors.

Prior contributory health history: 1) Seasonal upper respiratory allergies, primarily Spring and Fall 2) Occasional episodes of mild eczema (dermatitis) over the last few years on hands and forearms in times of extreme grief/stress 3) Occasional loose stools when under stress 4) Reports a history of being healthy, aside from this recent asthma problem; and athletic, involved in recreational sports. She enjoys caring for and riding her two horses but now finds difficulty exercising aerobically due to the dyspnea.

Characteristics of symptoms based upon Five Element Theory: a) Emotion of grief associated with the Lung meridian and skin conditions, as in this patients eczema. b) Patient's stress often causes loose stool, indicative of the coupled meridian association of Lung/ Large Intestine. C) The white pallored skin hue is also associated with the metal element (lung and large intestine).
