[Global patient safety action plan 2021-2030](#) World Health Organization, 2021-08-03

Patient safety is fundamental to the provision of health care in all settings. However, avoidable adverse events, errors and risks associated with health care remain major challenges for patient safety globally. The Seventy second World Health Assembly in 2019 adopted resolution WHA72.6 on global action on patient safety and mandated for development of a global patient safety action plan. This global action plan was adopted by Seventy Fourth World Health Assembly in 2021 with a vision of a world in which no one is harmed in health.

care and every patient receives safe and respectful care every time everywhere The purpose of the action plan is to provide strategic direction for all stakeholders for eliminating avoidable harm in health care and improving patient safety in different practice domains through policy actions on safety and quality of health services as well as for implementation of recommendations at the point of care The action plan provides a framework for countries to develop their respective national action plans on patient safety as well to align existing strategic instruments for improving patient safety in all clinical and health related programmes

**Building Safer Healthcare Systems** Peter Spurgeon,Mark-Alexander Sujan,Stephen Cross,Hugh Flanagan,2019-08-21 This book offers a new practical approach to healthcare reform Departing from the priorities applied in traditional approaches it instead assesses both theoretically and practically the successful lessons learned in other safety critical industries and applies them to healthcare settings The authors focus on the importance of human factors and performance measures to establish proactive systematic methods for healthcare system design This approach helps to identify potential hazards before accidents occur enhancing patient safety In addition the book details the new approach on the basis of real world applications in the NHS and insights from NHS staff Case studies and results are presented demonstrating the significant improvements that can be achieved in risk reduction and safety culture Lastly the book outlines what steps healthcare organisations need to take in order to successfully adopt this new approach The approach and experiential learning is brought together through the development of a new holistic patient safety education syllabus

**Patient Safety Now** Suzette Woodward,2022-10-04 Over the past decade or so we have seen a multitude of improvement programmes and projects to improve the safety of patient care in healthcare However the full potential of these efforts and especially those that seek to address an entire system has not yet been reached The current pandemic has made this more evident than ever We have tended to focus on problems in isolation one harm at a time and our efforts have been simplistic and myopic If we are to save more lives and significantly reduce patient harm we need to adopt a holistic

systematic approach that extends across cultural technological and procedural boundaries Patient Safety Now is about the fact that it is time to care for everyone impacted by patient safety how we need to take the time to care for everyone in a meaningful way and how hospitals need to enable staff time to care safely This book builds on the author s two previous books on patient safety Rethinking Patient Safety talked about ways in which we need to rethink patient safety in healthcare and describes what we ve learned over the last two decades Implementing Patient Safety talked about what we can do differently and how we can use those lessons learned to improve the way we implement patient safety initiatives and encourage a culture of safety across a healthcare system Patient Safety Now unites the concepts theories and ideas of the previous two books with updated material and examples including what has been learned by patient safety specialists during a pandemic Patient Safety Now provides the reader with a unique view of patient safety that looks beyond the traditional negative and retrospective approach to one that is proactive and recognizes the impact of conditions behaviours and cultures that exist in healthcare on everyone It is written not only for healthcare professionals and patient safety personnel but for patients and their families who all want the same thing Too often when things go wrong relationships quickly become adversarial when in fact this can be avoided by recognizing that rather than being in separate camps there are shared needs and goals in relations to patient safety    [Human Factors for Healthcare E-Book](#) Ally Ackbarally,Catie Paton,2024-04-04
