**Access to Justice** Xandra Kramer, Masood Ahmed, Adriani Dori, María Carlota Ucín, 2025-06-26 This book explores the complex landscape of costs and funding of civil justice. Access to civil justice continues to be undermined by State retrenchment of legal aid budgets, increases in procedural costs, the complexity of court procedures and severe delays in the dispensation of justice. This has resulted in a shift from public to private funding of civil litigation and the emergence of new business models and forms of private justice. The book explores the dynamic landscape of legal costs and financing from 3 perspectives: regulatory frameworks in public and private funding, new trends and challenges in contemporary legal financing, and the transformative potential of alternative dispute resolution (ADR) and online dispute resolution (ODR) procedures to streamline civil justice processes and expand access to justice. By addressing the intersectionality of legal, economic, political, market and social dynamics, the book helps readers gain a better understanding of the inherent complexity of costs, funding and their implications for access to justice. This timely resource offers academics, policymakers and practitioners valuable insights into the dynamics that shape the current state and future prospects of civil justice in Europe to help create sustainable pathways for improved access to justice.

*Re-Inventing Labour Law Enforcement* Louise Munkholm, 2020-04-30 This monograph investigates current issues in labour law enforcement from a socio-legal perspective. It analyses how local Italian enforcement actors promote the protection of workers in Prato, a city that in recent decades has seen a significant influx of Chinese migrants who run small workshops as part of the local clothing industry. Many of the Chinese firms in Prato fail to live up to core labour standards such as maximum working hours, health and safety at work, and payment of social security contributions. The book analyses the strategies and practices employed by three local enforcement actors: labour inspectors, labour unionists, and a new type of labour law consultant in their efforts to assist Chinese firms in improving their level of labour law compliance. Combining documentary interview and observational data, the book applies theories of legal culture and legal development to address the interaction between law and society. It focuses on the operational aspects of law by asking three interrelated research questions: How do local enforcement actors promote the protection of workers in Chinese firms in Prato? Which tools are employed and which rationalities drive the initiatives? The book thereby sheds light upon processes of legal cultural adaptation informing ongoing international and national debates about what can actually be done to combat contemporary gaps in the protection of workers.
