Comparative Philosophy Without Borders Arindam Chakrabarti, Ralph Weber, 2017-05-18 Comparative Philosophy without Borders presents original scholarship by leading contemporary comparative philosophers each addressing a philosophical issue that transcends the concerns of any one cultural tradition. By critically discussing and weaving together these contributions in terms of their philosophical presuppositions this cutting edge volume initiates a more sophisticated albeit diverse understanding of doing comparative philosophy. Within a broad conception of the alternative shapes that work in philosophy may take this volume breaks three kinds of boundaries between cultures historical periods and sub disciplines of philosophy such as metaphysics epistemology ethics aesthetics and political philosophy. As well as distinguishing three phases of the development of comparative philosophy up to the present day the editors argue why the discipline now needs to enter a new phase. Putting to use philosophical thought and textual sources from Eurasia and Africa contributors discuss modern psychological and cognitive science approaches to the nature of mind and topics as different as perception poetry justice authority and the very possibility of understanding other people. Comparative Philosophy without Borders demonstrates how drawing on philosophical resources from across cultural traditions can produce sound state of the art progressive philosophy. Fusing the horizons of traditions opens up a space for creative conceptual thinking outside all sorts of boxes

**Humanism in Trans-civilizational Perspectives** Jana S. Rošker, 2023-09-10 This book introduces into the current global ethics debate models of humanism developed in classical Chinese traditions which have not yet been comprehensively presented to Western scholarship or integrated into the framework of global discourses on social ethics and morality. It creates new paradigms for an understanding of humanism that meets the demands of our time. It begins by presenting European descriptions and critical assessments of this discourse and then moves to an exploration of humanistic ideas shaped through historical developments in Asia with a focus on the Chinese tradition. In this sense the book is written from a transcivilizational perspective. The methods used in the research transcend that is surpass and overcome the rigid isolating and essentialist concept of civilization. At the same time the book points to the possibility of transformation through the exchange of knowledge and ideas between different civilizations. Within this framework the book starts from the assumption that the ontology of civilizations and cultures is not based on immutable substances but on the relations between different factors that constitute them as categories. The transcivilizational perspective rooted in transcultural dialogues between philosophies that originated in different cultures and civilizations is particularly valuable because of the globalized world in which we live today. This means that the problems that affect people in different parts of the world and the issues that are embedded in different geopolitical and developmental frameworks also affect all of humanity. This book is of particular interest to scholars and students of global ethics globalization Asian philosophy and Sinology

*Knowledges Born in the Struggle* Boaventura de Sousa Santos,Maria Meneses,2019-10-17 In a world overwhelmingly unjust and seemingly deprived of alternatives this book claims that the alternatives can be found among us These alternatives are however discredited or made invisible by the dominant ways of knowing Rather than alternatives therefore we need an alternative way of thinking of alternatives Such an alternative way of thinking lies in the knowledges born in the struggles against capitalism colonialism and patriarchy the three main forms of modern domination In their immense diversity such ways of knowing constitute the Global South as an epistemic subject The epistemologies of the South are guided by the idea that another world is possible and urgently needed they emerge both in the geographical north and in the geographical south whenever collectives of people fight against modern domination Learning from and with the epistemic South suggests that the alternative to a general theory is the promotion of an ecology of knowledges based on intercultural and interpolitical translation
