**Regulatory Problems and Disorders in Early Childhood: Aetiology, Contextual Factors, Developmental Outcomes and Pathways, and Treatment Options** Anna Katharina Georg, Ayten Bilgin, Julia Jaekel,2025-01-08 Regulatory problems defined as excessive crying sleeping or feeding problems are among the most common concerns of parents with children 0 5 years old These problems are typically understood within the context of the parent child relationship however the complex underlying mechanisms that explain the occurrence and continuation as well as long term outcomes of regulatory problems are still poorly understood Despite some

promising treatment options important knowledge gaps remain to be addressed which will inform evidence based practice for services of children aged 0-5. With this Research Topic we aim to bring together research from different countries and from multidisciplinary research backgrounds on the topic of regulatory problems and disorders. We particularly encourage research that focuses on observed parent child interactions in relation to regulatory problems. We view regulatory problems as a transdiagnostic biopsychosocial concept covering excessive crying, sleeping and/or feeding and eating problems. However, studies with a focus on any of these problems are also encouraged.
