## Doordash Prices Setup:

*The Fight Against Platform Capitalism* Jamie Woodcock, 2021-03-02 So far platform work has been an important laboratory for capital Management techniques like the use of algorithms are being tested with a view to exporting across the global economy and it is argued that automation is undermining workers agency Although the contractual trick of self employment has allowed platforms to grow quickly and keep their costs down yet it has also been the case also that workers have also found they can strike without following the existing regulations This book develops a critique of platforms and platform capitalism from the perspective of workers and contributes to the ongoing debates about the future of work and worker organising It presents an alternative portrait returning to a focus on workers experience focusing on solidarity drawing out a global picture of new forms of agency In particular the book focuses on three dynamics that are driving struggles in the platform economy the increasing connections between workers who are no longer isolated the lack of communication and negotiation from platforms leading to escalating worker action around shared issues and the internationalisation of platforms which has laid the basis for new transnational solidarity Focusing on transport and courier workers online workers and freelancers author Jamie Woodcock concludes by considering how workers build power in different situations Rather than undermining worker agency platforms have instead provided the technical basis for the emergence of new global struggles against capitalism

## Urban Mobility

Shauna Brail, Betsy Donald, 2024-08-30 Urban Mobility sheds light on mobility in twenty first century Canadian cities The book explores the profound changes associated with technological innovation pandemic induced impacts on travel behaviour and the urgent need for mobility to respond meaningfully to the climate crisis Featuring contributions from leading Canadian and American scholars and researchers this edited collection traverses disciplines including geography engineering management policy studies political science and urban planning Chapters illuminate novel research findings related to a variety of modes of mobility including public transit e scooters bike sharing ride hailing and autonomous vehicles Contributors draw out the connections between urban challenges technological change societal need and governance mechanisms The collection demonstrates why the smart phone COVID 19 and climate present a crucial lens through which we can understand the present and future of urban mobility The way we move in cities has been disrupted and altered because of technological innovation the lingering impacts of COVID 19 and efforts to reduce transport related emissions Urban Mobility concludes that the path forward requires good public policy from all levels of government working in partnership with the private sector and non profits to direct and address the best urban mobility framework for Canadian cities
