machines and artists have engaged in expressing the human condition along with the condition of living with machines through player pianos broadcasting technology electric organs digital movie effects synthesizers and motion capture By communicating and informing human knowledge the machines have exerted considerable influence on the history of art and often more influence than humans have been willing to recognize As Hajdu proclaims before machine learning there was machine teaching With thoughtful wide ranging and surprising turns from Berry Gordy and George Harrison to Andy Warhol and Stevie Wonder David Hajdu takes a novel and contrarian approach he sees how machines through the ages have enabled creativity not stifled it and The Uncanny Muse sees no reason why this shouldn't be the case with AI today *Leadership 2.0 in processes of a sustainable change* Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover **Essays on Longtermism** Hilary Greaves, Jacob Barrett, David Thorstad, 2025-09-02 This is an open access title It is available to read and download as a free PDF version on Oxford Academic and is made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 International licence Longtermism broadly speaking is the view that positively influencing the long term future is one of the key moral priorities of our time Calls for taking a long term view towards global problems such as climate change and poverty are familiar typically urging us to plan on a scale of decades or perhaps a century By contrast longtermism asks us to take seriously the idea that what we should do right now may depend on the effects of our actions thousands even millions of years into the future Essays on Longtermism brings together leading scholars to discuss four sets of overlapping questions raised by the longtermist approach First should we accept some version of longtermism Second to

what extent can we predict and control the far future Third which ethical priorities are recommended by longtermism and how revisionary are they Finally what implications would longtermism have for the design or reform of social political and legal institutions Contributors who include both supporters and critics of longtermism are drawn from a range of disciplines including philosophy economics psychology law political science and mathematics and from private industry
