**Age of Auto Electric** Matthew N. Eisler, 2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking's transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries Age of Auto Electric instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed *Free Attractions, U.S.A.* Mary VanMeer, 1984 This guide lists more than 4 000 free attractions covering a multitude of fascinating places such as museums galleries parks gardens natural wonders zoos historical sites tours and exhibits Each entry contains a description detailed directions hours season and other information of interest as well as a map to make travel easier Arranged alphabetically by state and then by city this guide is a companion to VanMeer's Guide to Free Campgrounds ISBN 0 912528 36 2 pbk 10 95 For use only in the library **Ghost Road** Anthony M. Townsend, 2020-06-16 A penetrating look at near future disruption as truly autonomous vehicles arrive For decades we have dreamed of building an automobile that can drive itself But as that dream of autonomy draws close we are discovering that the driverless car is a red herring When self driving technology infects buses bikes delivery vans and even buildings a wild woollier future awaits Technology will transform life behind the wheel into a high def video game that makes our ride safer smoother and more efficient Meanwhile autonomous vehicles will turbocharge our appetite for the instant delivery of goods making the future as much about moving things as it is about moving people Giant corporations will link the automated machines that move us to the cloud raising concerns about mobility monopolies and privatization of streets and sidewalks The pace of our daily lives and the fabric of our cities and towns will change dramatically as automated vehicles reprogram the way we work shop and play Ghost Road is both a beacon and a warning it explains where we might be headed together in driverless vehicles and the choices we must make as societies and individuals to shape that future Harnessing the Wheelwork of Nature Thomas Valone, 2002 Presents the compelling argument for Tesla's most ambitious project the wireless transmission of power A possible solution to the world power crisis The New Education , 1899 Managing
