**Journalism in the Age of Virtual Reality** John V. Pavlik, 2019-09-17 With the advent of the internet and handheld or wearable media systems that

plunge the user into 360o video augmented or virtual reality technology is changing how stories are told and created In this book John V Pavlik argues that a new form of mediated communication has emerged experiential news Experiential media delivers not just news stories but also news experiences in which the consumer engages news as a participant or virtual eyewitness in immersive multisensory and interactive narratives Pavlik describes and analyzes new tools and approaches that allow journalists to tell stories that go beyond text and image He delves into developing forms such as virtual reality haptic technologies interactive documentaries and drone media presenting the principles of how to design and frame a story using these techniques Pavlik warns that although experiential news can heighten user engagement and increase understanding it may also fuel the transformation of fake news into artificial realities and he discusses the standards of ethics and accuracy needed to build public trust in journalism in the age of virtual reality Journalism in the Age of Virtual Reality offers important lessons for practitioners seeking to produce quality experiential news and those interested in the ethical considerations that experiential media raise for journalism and the public

**Wearable Sensors** Edward Sazonov,2020-11-10 Wearable Sensors Fundamentals Implementation and Applications has been written by a collection of experts in their field who each provide you with an understanding of how to design and work with wearable sensors Together these insights provide the first single source of information on wearable sensors that would be a fantastic addition to the library of any engineers working in this field Wearable Sensors covers a wide variety of topics associated with development and applications of wearable sensors It also provides an overview and a coherent summary of many aspects of wearable sensor technology Both professionals in industries and academic researchers need this package of information in order to learn the overview and each specific technology at the same time This book includes the most current knowledge on the advancement of light weight hardware energy harvesting signal processing and wireless communications and networks Practical problems with smart fabrics biomonitoring and health informatics are all addressed plus end user centric design ethical and safety issues The new edition is completely reviewed by key figures in the field who offer authoritative and comprehensive information on the various topics A new feature for the second edition is the incorporation of key background information on topics to allow the less advanced user access to the field and to make the title more of an auto didactic book for undergraduates Provides a full revision of the first edition providing a comprehensive and up to date resource of all currently used wearable devices in an accessible and structured manner Helps engineers manufacture wearable devices with information on current technologies with a focus on end user needs and recycling requirements This book provides a fully updated overview of the many aspects of wearable sensor technology in one single volume enabling engineers and researchers to fully comprehend the field and to identify opportunities
