**Retreat of the HPI Research School on Service-oriented Systems Engineering** Meinel, Christoph , Plattner, Hasso , Döllner, Jürgen , Weske, Mathias , Polze, Andreas , Hirschfeld, Robert , Naumann, Felix , Giese, Holger , Baudisch, Patrick , Friedrich, Tobias , Müller, Emmanuel , 2018-01-17 Design and Implementation of service oriented architectures imposes a huge number of research questions from the fields of software engineering system analysis and modeling adaptability and application integration Component orientation and web services are two approaches for design and realization of complex web based system Both approaches allow for dynamic application adaptation as well as integration of enterprise application

Commonly used technologies such as J2EE and .NET form de facto standards for the realization of complex distributed systems. Evolution of component systems has led to web services and service based architectures. This has been manifested in a multitude of industry standards and initiatives such as XML, WSDL, UDDI, SOAP, etc. All these achievements lead to a new and promising paradigm in IT systems engineering which proposes to design complex software solutions as collaboration of contractually defined software services. Service Oriented Systems Engineering represents a symbiosis of best practices in object orientation, component based development, distributed computing and business process management. It provides integration of business and IT concerns. The annual Ph.D. Retreat of the Research School provides each member the opportunity to present his/her current state of their research and to give an outline of a prospective Ph.D. thesis. Due to the interdisciplinary structure of the research school, this technical report covers a wide range of topics. These include but are not limited to Human Computer Interaction and Computer Vision as Service, Service oriented Geovisualization Systems, Algorithm Engineering for Service oriented Systems, Modeling and Verification of Self adaptive Service oriented Systems, Tools and Methods for Software Engineering in Service oriented Systems, Security Engineering of Service based IT Systems, Service oriented Information Systems, Evolutionary Transition of Enterprise Applications to Service Orientation, Operating System Abstractions for Service oriented Computing and Services, Specification Composition and Enactment.

*On the Edge* Nate Silver, 2024-08-13. AN INTERNATIONAL BESTSELLER WITH A NEW PREFACE. Masterly Utterly compelling. A highly readable and engaging tour. Sam Freedman, *The Times*. From the New York Times bestselling author of *The Signal and the Noise*, the definitive guide to our era of risk and the players raising the stakes. In the bestselling *The Signal and the Noise*, Nate Silver showed how forecasting would define the age of Big Data. Now in this timely and riveting new book, Silver investigates The River or those whose mastery of risk allows them to shape and dominate so much of modern life. These professional risk takers, poker players and hedge fund managers, crypto true believers and blue chip art collectors, can teach us much about navigating the uncertainty of the 21st century. By embedding within these worlds, Silver offers insight into a range of issues that affect us all from the frontiers of finance to the future of AI. The River has increasing amounts of wealth and power in our society and understanding their mindset, including the flaws in their thinking, is key to understanding what drives technology and the global economy today. There are certain commonalities in this otherwise diverse group: high tolerance for risk, appreciation of uncertainty, affinity for numbers, skill at de-coupling self-reliance and a distrust of the conventional wisdom. For the River, complexity is baked in and the work is how to navigate it without going beyond the pale. Taking us behind the scenes from casinos to venture capital firms to meetings of the effective altruism movement, *On the Edge* is a deeply reported, all-access journey into a hidden world of powerbrokers and risk takers.
