This book is of interest to researchers in literacy and educational psychology as well as curriculum developers

The Contextualisation of 21st Century Skills

Esther Care, Mauro Giacomazzi, John Kabutha Mugo, 2024-02-19 This open access book is written for educators and policymakers who seek to empower young people with competencies necessary for fulfilling lives in the 21st century. It reports how a large group of educators from government and civil society organisations together with researchers from universities used their curriculum assessment and social economy expertise to develop contextualised definitions of life skills and values and associated assessment tools. The book also reports on levels of these competencies of over 45 000 adolescents from a household based assessment conducted in Kenya, Tanzania and Uganda. The results describe how these adolescents vary in proficiency by region, age and other factors providing a resource for national education ministries to factor into policy decisions. Given the technical requirements of measuring individuals social emotional and related competencies, how is it possible to capture an adolescent's life skills across varied contexts? The book provides readers with a pragmatic yet technically robust process for undertaking a large scale assessment program designed to inform policy

Developmental Perspectives in Written Language and Literacy Eliane Segers, Paul van den Broek, 2017-12-15 Research on the development of written language and literacy is inherently multidisciplinary. In this book leading researchers studying brain cognition and behavior come together in revealing how children develop written language and literacy, why they may experience difficulties and which interventions may help those who struggle. Each chapter provides an overview of a specific area of expertise focusing on typical and atypical development, providing steps for future research and discussing practical implications of the work. The book covers areas of bilingualism, dyslexia, reading comprehension, learning to read, atypical populations, intervention and new media. Thus the book presents a comprehensive overview of the current state of affairs in this field of research. The various book chapters have been written by researchers who all have collaborated at some point in their careers with Ludo Verhoeven whose research sets the example for the importance of crossing disciplinary borders to research to take the next important steps. The combination of the research in this book sets the stage for future research that

connects various fields and hopes to inspire anyone interested in the development of written language and literacy

Assessing Academic English for Higher Education Admissions Xiaoming Xi, John M. Norris, 2021-05-26 Assessing Academic English for Higher Education Admissions is a state of the art overview of advances in theories and practices relevant to the assessment of academic English skills for higher education admissions purposes. The volume includes a brief introduction followed by four main chapters focusing on critical developments in theories and practices for assessing reading, listening, writing, and speaking, of which the latter two also address the assessment of integrated skills such as reading, writing, listening, speaking, and reading, listening, speaking. Each chapter reviews new task types, scoring approaches, and scoring technologies and their implications in light of the increasing use of technology in academic communication and the growing use of English as a lingua franca worldwide. The volume concludes with recommendations about critical areas of research and development that will help move the field forward. Assessing Academic English for Higher Education Admissions is an ideal resource for researchers and graduate students in language testing and assessment worldwide.

Psychologie du développement Raphaële Miljkovitch, Françoise Morange-Majoux, Emmanuel Sander, 2017-06-20 En s'intéressant à l'évolution psychologique de l'individu tout au long de la vie perspective life span la psychologie du développement se propose d'étudier les processus qui permettent cette évolution en y décrivant non seulement les étapes mais également en identifiant les facteurs et les mécanismes qui les influencent et les agencent. Fruit la fois d'acquisitions de connaissances de progressions techniques et d'influences socio-éducatives et culturelles fortes la psychologie du développement a su se nourrir des différentes évolutions de la psychologie des sciences médicales et des approches physiologiques mais aussi des avancées scientifiques en matière d'imagerie médicale afin d'ancre la discipline dans la démonstration de faits objectivables. Ce trait a ainsi pour ambition de rendre compte de la diversité de ces approches méthodologiques et applications en psychologie du développement selon une progression régulière et se organise ainsi en six parties. Les modèles du développement Les domaines du développement L'éducation La psychopathologie et les troubles du développement Les transitions et enjeux sociaux Les méthodes en psychologie du développement Destin aux étudiants en psychologie car traitant de l'ensemble de leur cursus de manière progressive L1 M2 cet ouvrage est également une référence pour les praticiens grâce son contenu actualisé et exhaustif en psychologie du développement. Handbook of Individual Differences in Reading Peter Afflerbach, 2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading. Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences. Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge, operate, interact, and change. The scant comprehensive accounting of individual differences in reading is

reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide *prima facie* evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area
