## **Media Bias In Presidential Election Evaluation Via Formal Measurement:**

**Media Bias in Presidential Election Coverage 1948-2008** David W. D'Alessio, 2012-03-22 Accusations of partisan bias in Presidential election coverage are suspect at best and self serving at worst. They are generally supported by the methodology of instance confirmation tainted by the hostile media effect and based on simplistic visions of how the news media are organized. *Media Bias in Presidential Election Coverage 1948-2008* by Dave D'Alessio is a revealing analysis that shows the news media have four essential natures as journalistic entities, businesses, political actors, and property, all of which can act to create news coverage biases in some cases in opposing directions. By meta-analyzing the results of 99 previous examinations of media coverage of Presidential elections from 1948 to 2008, D'Alessio reveals that coverage has no aggregate partisan bias either way, even though there are small biases in specific realms that are generally insubstantial. Furthermore, while publishers used to control coverage preferences, this practice has become negligible in recent years. *Media Bias* proves that at least in terms of Presidential election coverage, The New York Times is not the most liberal paper in America and the Fox News channel is substantially more conservative in news coverage than the broadcast networks. Finally, *Media Bias in Presidential Election Coverage 1948-2008* predicts that no amount of evidence will cause political candidates to cease complaining about bias because such accusations have both strategic potential in campaigns and an undeniable utility in ego defense.

*Media Bias in Presidential Election Coverage, 1948-2008* Dave D'Alessio, 2012 In *Media Bias in Presidential Election Coverage 1948-2008* Dave D'Alessio employs meta-analytic techniques to examine whether there are partisan biases in coverage of Presidential election campaigns in newspapers, on TV, and in the news magazines. This study further analyses the four essential natures of news media as journalistic entities, property, businesses, and political actors. Aggregating the results of 99 previous studies, D'Alessio scrutinizes bias claims in news media and why political candidates consistently

**Political Election Debates** William L. Benoit, 2013-09-20 Political debates are an important facet of modern election campaigns. How politicians frame an argument, how the audience perceives it, and how the media decides to display it, are key components in analyzing the outcome of a political debate and ultimately an election. Drawing mainly on the functional theory of political campaign discourse, William L. Benoit examines a wide variety of debates not only in the United States but across the globe. Because each phase of election offers new challenges, specific attention is paid to how primary versus general and incumbency influence the content of political leaders' debate practices. Specifically, the book delves into the history and nature of debates in various United States elections, including presidential, vice presidential, senatorial, gubernatorial, and mayoral candidates. Also examined are debates ranging from the United Kingdom to South Korea to Australia. Benoit also employs the issues ownership theory and functional federalism theory as a deeper part of the analysis. This book offers a critical examination and comprehensive overview of election debate theory.

**Unequal America** Anthony DiMaggio, 2020-12-09 This book examines Americans and their beliefs about the class divide in the United States. It argues that Americans' beliefs about

class and the economic divide develop through a multistep process Economic affluence influences the development of worldview measured in terms of ideology partisanship and self identified class consciousness Class consciousness in turn affects how people look at political and economic issues This book is intended for scholars and students at every level who study inequality from a political economic or sociological position along with general readers with a growing interest in and awareness of the effects of inequality on our democracy especially in the wake of the Covid 19 pandemic the resulting economic contraction and the protests over racial injustice erupting throughout the world in 2020

### **Reporting Elections**

Stephen Cushion, Richard Thomas, 2018-03-02 How elections are reported has important implications for the health of democracy and informed citizenship But how informative are the news media during campaigns What kind of logic do they follow How well do they serve citizens e Based on original research as well as the most comprehensive assessment of election studies to date Cushion and Thomas examine how campaigns are reported in many advanced Western democracies In doing so they engage with debates about the mediatization of politics media systems information environments media ownership regulation political news horserace journalism objectivity impartiality agenda setting and the relationship between media and democracy more generally Focusing on the most recent US and UK election campaigns they consider how the logic of election coverage could be rethought in ways that better serve the democratic needs of citizens Above all they argue that election reporting should be driven by a public logic where the agenda of voters takes centre stage in the campaign and the policies of respective political parties receive more airtime and independent scrutiny The book is essential reading for scholars and students in political communication and journalism studies political science media and communication studies
