Media Debates Everette E. Dennis, John Calhoun Merrill, 1991 Journalism: Critical Issues Allan, Stuart, 2005-01-01 Over the years it has been frequently remarked that journalism is at a crossroads indeed so often that it risks sounding somewhat cliched yet there is every indication that its very forms practices and institutions are being decisively transformed with startling implications Accordingly the principal aim of this book is to help provide the basis for new dialogues to emerge regarding journalism today as well as about where it may be heading tomorrow Journalism Critical Issues poses a series of important questions afresh questions deserving of much greater attention than they have typically received to date Each of the contributors seeks to challenge conventional ways of thinking about the critical issue at stake in their respective chapter In so doing it is their intention to further our understanding but also to encourage future explorations with the potential to revitalise journalism studies In adopting this approach it is hoped that the book will make for a lively argumentative in the best sense of the word and engaging intervention

**Climate Change and the Media** Tammy Boyce,Justin Lewis,2009

It is now more than a quarter of a century since the Intergovernmental Panel on Climate Change published their first comprehensive report on the dangers posed by anthropogenic global warming Over the last twenty five years the weight of evidence about the causes and consequences of climate change has become compelling The solutions are fairly simple we must switch to more sustainable and efficient forms of energy production And yet they remain elusive globally we produce significantly more greenhouse gases now than we did back in 1990 The sad truth is that this inaction has made climate change inevitable the only question that remains is whether we can prevent it spiraling out of control How do we explain this colossal global failure The problem is political rather than scientific we know the risks and we know how to address them but we lack the political will to do so The media are pivotal in this equation they have the power to set the public and the political agenda Climate Change and the Media Volume 2 gathers contributions from a range of international scholars to explore the media's role in our understanding of the problem and our willingness to take action Combined these chapters explain how and why media coverage has to date fallen short in communicating both the science and the politics of climate change They also offer guidance about how the media might shift from being the problem to becoming part of the solution

**Amerasia Journal** ,2010

**Fathering Across Diversity and Adversity: International Perspectives and Policy Interventions** Andrea Doucet,Elihu Katz,Paddy Scannell,Rosalind Edwards,Frank F. Furstenberg,2009-07-15 Over the past few decades scholarly and policy interest in fatherhood and fathering has burgeoned

in large part because of profound social changes in women s and men s lives in the last half of the twentieth century However this research has remained largely national in focus with little cross cultural dissemination of knowledge about fathering practices and supportive or constraining social policies This insightful volume presents a transatlantic perspective on fatherhood and fathering comparatively across nation states as well as in individual countries including the United States Canada United Kingdom and Norway Exploring the diversity of fatherhood it encompasses differences across social class race and ethnicity age and life course and varied household formations The articles examine young fathers separated and divorced fathers fathers from minority ethnic and immigrant groups working class fathers new fathers gay fathers and fathers of children with special needs Readers can gauge the different epochs of fathering over time and explore the tension that fathers may experience between being good financial providers and actively caring for their children Authored by leading figures in fathering research from North America Europe and Scandinavia the multilayered and intriguing articles in this volume of *The ANNALS* point toward the need for sustainable policy frameworks that enable fathers to be involved in their children s lives in ways that do not include biased assumptions about the expression of that involvement
