Valley,Mikhail Alekseevich Voront□s□ov,2004 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature   **Automatic Summarising and the CLASP System** Richard Tucker,2000 Abstract This dissertation discusses summarisers and summarising in general and presents a new summarising system CLASP In chapters 1 3 I present a framework for thinking about summarisers in terms of context factors and the three stages of analysis condensation and synthesis I look at previous research in automatic summarising and identify four main directions that have been taken I consider how summarising systems may be and have been evaluated CLASP described in chapters 4 7 takes a new approach based on a shallow semantic representation of the source text as a predication cohesion graph Nodes in the graph are simple predications corresponding to events states and entities mentioned in the text edges indicate related or similar nodes Summary content is chosen by selecting some of these predications according to criteria of importance representativeness and cohesiveness These criteria are expressed as functions on the nodes of a weighted graph Summary text is produced either by extracting whole sentences from the source text or by generating short indicative summary phrases from the selected predications CLASP uses linguistic processing but no domain knowledge and therefore does not restrict the subject matter of the source text It is intended to deal robustly with complex texts that it cannot analyse completely accurately or in full Chapter 8 describes experiments in summarising stories from the Wall Street Journal The results suggest that there may be a benefit in identifying important material in a semantic representation rather than a surface one but that despite the robustness of the source representation inaccuracies in CLASP s linguistic analysis can dramatically affect the readability of its summaries In chapter 9 I suggest ways in which CLASP could be modified to overcome this and other problems   Implementing Oracle Fusion General Ledger and Oracle Fusion Accounting Hub Anil
