Brophy,2009-01-21 Street Lore is a book based on children games that were played in the streets of New York around the 50 s During this period the children didn t have the games like kids have today nor did they have the money So the children of this time would create their own toys from what they had lying around in the streets An example would be the wooden boxes from the greengrocers on every corner This would be their main source of building material In addition to their homemade toys they had games The game changed with the seasons and the aging process Some were as traditional as tag hide and seek and marbles while others were local and spontaneous hot beans and butter Highest to the moon lowest to the earth The neighborhood was poor and the environment was rough but the kids were to busy playing to have ever noticed This book is based on the belief that these memories are part of a lore that should not be lost It is a part of American history a small part granted but enough to stimulate a wider perception of an era that its own way of doing things it did **Annual Reports of the Secretary of War** United States. reflected waves then travel back into the computational grid modifying the flow field conditions in the regions through which they pass thereby ending the simulation of free field conditions **The War-ships and Navies of the World** James Wilson King,1881 **Perception** ,2007 Professional Papers of the Corps of R.
