China's Foreign Investment Law in the New Normal Shen Wei, 2022-12-29 This book analyzes China's new foreign investment law which came into force in January 2020. The new law implemented sweeping changes and overhauled China's foreign investment law regime of the last four decades. The foreign investment law aims to make the business environment more investor friendly and address some of the contentious issues between US and China in the ongoing trade war. The book explains how the law enhances regulatory transparency. It also outlines the new approval process that is the pre-establishment negative list system which has replaced the former approval system for foreign investment projects. The book also analyzes China's series of anti-sanction laws. This book will help give readers a better understanding of major changes and benefits under the new law and will be the first of its kind looking at the implications of this important law. Social

Media and the Sale of Illicit Substances Niklaus Julian Sempach, 2024-11-29 This publication provides an exploratory overview of newly emerging digital drug markets as well as a critical discussion of criminal responsibility of platforms for hosting user-generated content under 47 U.S.C. 230 in light of the newly enacted EU Digital Services Act. *Governing Cross-Border Data Flows* Svetlana Yakovleva, 2024-02-27 *Governing Cross Border Data Flows* explores how the European Union can simultaneously reconcile and pursue two important legal and policy objectives namely protecting fundamental rights guaranteed under the EU Charter of Fundamental Rights EU Charter concerning privacy and personal data while also maintaining and developing a binding rules-based global trading system to ensure appropriate access to foreign digital markets for EU businesses. The book demonstrates a significant conflict between international trade law and European data privacy law when it comes to the governance of cross border flows of personal data. To resolve the tensions caused by this clash the book proposes concrete and detailed ways to ameliorate the situation from both ends international trade and personal data protection specifically through reforms of both international trade and chapter V of the General Data Protection Regulation GDPR. To explain how such reforms could be effectuated Yakovleva examines the role of discourse in the evolution of trade law in the last two decades. The book also paves the way for the further research necessary to design a fully fledged reform proposal of the EU framework for the transfer of personal data outside the European Economic Area.

Tech Wars: US-China Technology Competition and What it Means for Australia Brendan Thomas-Noone, 2020-06-16 Technology is now the defining element of the Trump administration's self-professed strategic competition with China. Washington is highly attuned to the long-term consequences and links between scientific progress technological adaptation and national power in burgeoning US-China competition. Policymakers are attempting to balance efforts to maintain the open and global foundations of US and allied research and development systems while deterring those that abuse its accessible and integrated nature. While President Donald Trump has been highly inconsistent on technological issues Congress and the executive branch have slowly moved forward in executing the 2017 National Security Strategy and protecting what it termed

the US National Security Innovation Base Congress and the Trump administration have embarked on a ponderous and at times heavy handed effort to protect America's technological advantage across multiple domains and through actions by several branches of government Congress has expanded the powers of the Committee of Foreign Investment to review non controlling investments in technology companies New export controls are being rolled out which feature vastly more expansive definitions of foundational and emerging technologies broadening their scope and potential reach The Department of Justice has launched a major criminal justice campaign labelled the China Initiative with the goal of prosecuting technology theft and enforcing existing regulations in every US state Draft bills indicate the likely expansion of Congressional reform to halting the flow of US government funds flowing to overseas partners also involved in joint high tech research and development R D with China affecting third parties like Australia Australia will be significantly affected by Washington's unravelling of the US China technological relationship owing to its deep enmeshment with America's scientific infrastructure To navigate these changes in the national interest Canberra must consider the following Australia will face growing pressure to limit its science and technology interaction with China in critical dual use fields in order to maintain technological collaboration with the United States in some emerging technologies and may even be required to adopt restrictive export control policies Australian research by universities defence industry business and government agencies will be seriously impacted by the United States expanded export control reform Canberra should continue to lobby US policymakers on solutions such as providing exemptions under the National Technology and Industrial Base framework As the global technological ecosystem becomes more nationalised securitised and difficult to navigate for industry and governments alike Australia should implement a national research and development strategy that builds its own technological counterweight
