Cyber Persistence Theory Michael P. Fischerkeller, Emily O. Goldman, Richard J. Harknett, 2022. A bold re-conceptualization of the fundamentals driving behavior and dynamics in cyberspace. Most cyber operations and campaigns fall short of activities that states would regard as armed conflict. In *Cyber Persistence Theory* Michael P. Fischerkeller, Emily O. Goldman and Richard J. Harknett argue that a failure to understand this strategic competitive space has led many states to misapply the logic and strategies of coercion and conflict to this environment and thus suffer strategic loss as a result. The authors show how the paradigm of deterrence theory can neither explain nor manage the preponderance of state cyber activity. They present a new theory that illuminates the exploitive rather than coercive dynamics of cyber competition and an analytical framework that can serve as the basis for new strategies of persistence. Drawing on their policy experience, they offer a new set of prescriptions to guide policymakers toward a more stable, secure cyberspace.

Children's Technology Review, 2005. **Disconnected** Milan Frankl, 2025-02-25. *Disconnected: Exploring the Decline of Social Networks* examines the future of social networks, highlighting their transformation from community builders to sources of misinformation and frustration. Using interdisciplinary insights, it uncovers the complex interplay of technological, social, and cultural factors behind this shift. It discusses the impact on individuals, businesses, and society, proposing pathways to a healthier digital environment. The book delves into the fascinating journey of social networks, tracing their evolution from tools that fostered community building to platforms that can sometimes spread misinformation. It explores how privacy issues are crucial in shaping user experiences and trust. *Disconnected* also examines the phenomenon of algorithmic polarization, where algorithms create echo chambers and contribute to the spread of disinformation. The author explores the social and cultural factors that influence social networks. Additionally, he includes case studies that highlight the real-world impacts of social networks on individuals, businesses, and society as a whole. Readers will discover practical solutions that offer pathways to creating a healthier digital environment, enable recognition of misinformation and privacy issues more effectively, as well as gain strategic insights that will help navigate and influence the future of social networks.

How Incumbent Firms Navigate Nascent Digital Platform Ecosystems in the Internet of Things Daniel Hodapp, 2021-03-17. This thesis is focusing on three little explored contextual conditions that are important for a better understanding of digital platform ecosystems: digital platforms in a nascent stage of maturity, digital platforms built by incumbents, and digital platforms embedded in the IoT phenomenon. Thus, the thesis contributes to the question of how established companies are navigating nascent digital platform ecosystems in the IoT. The work builds and contributes to the literature on digital platform ecosystems. Three main

contributions are made through explorative qualitative research in the form of Delphi and case studies as well as through systematic literature research on the above mentioned themes First the thesis synthesizes important knowledge about the nascent stage of digital platform ecosystems and identifies value co creation challenges specific to this early maturity stage Second given the increasing importance of established companies in the platform discourse this thesis identifies the intra and inter organizational challenges that incumbent organizations face in building digital platform ecosystems emphasizing the importance of the organizational type in building a platform ecosystem Third the dissertation positions platforms in the IoT as a new digital platform instantiation within the scholarly platform discourse and outlines important phoneme related characteristics that determine value creation
