*Gene Therapy for HIV and Chronic Infections* Ben Berkhout,Hildegund C.J. Ertl,Marc S. Weinberg,2015-03-10 This book centers on gene therapy and gene transfer approaches to prevent or treat chronic virus infections The main focus is on the Big Three human immunodeficiency virus HIV 1 hepatitis B virus HBV and hepatitis C virus HCV Ample anti HIV drugs are currently available in the clinic and the development of an effective combination therapy has dramatically improved the lifespan and quality of life of infected individuals A similar trend can already be recognized for HBV and HCV the development of multiple directly acting antiviral drugs and plans to control or even cure the infection However approaches that help prevent infection or which provide long lasting treatment such as a cure remain important goals Immunization through gene transfer vehicles encoding immunogenic viral proteins shows promise in preventing infections with complex highly variable viruses such as HIV 1 or HCV Gene therapy applications for virus infections have been discussed since the early 1990 s Whereas a true cure seems difficult to achieve for HIV 1 due to its intrinsic property to deposit its genome into that of the host such attempts may be within reach for HCV where spontaneous viral clearance occurs in a small percentage of the infected individuals The prospect of original gene therapy approaches may provide alternative ways to reach the same endpoint by for example silencing of CCR5 expression post transcriptionally Many alternative antiviral strategies have been developed based on a variety of novel molecular methods e g ribozymes Some studies have progressed towards pre clinical

animal models and a few antiviral gene therapies have progressed towards clinical trials This book provides an overview of this rapidly progressing field while focusing on the interface of gene therapy and immunology vaccinology **Viral Politics** Anthony Arthur Painter,Ben Wardle,2001 From the John Holmes Library collection **Challenges to the Enlightenment** Academy of Humanism,1994-02 Modern western society with its democratic institutions and its reliance on science as the basis of technology and industry is largely an outgrowth of Enlightenment ideals Yet today the entire Enlightenment agenda is being challenged not only by members of the religious orthodoxy but also by a group of academics loosely described under the label of postmodernism Whereas the Enlightenment project has always been at odds with religious orthodoxy which has traditionally been suspicious of efforts to achieve human progress without supernatural support today it must deal with a very different type of attack from postmodernist intellectuals **The Secret Guide to Computers, 2001** Russ Walter,2000-10 *PC Mag* ,2004-07 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology The Secret Guide to Computers 2003 Russ Walter,2002-08
