Dodda, 2025-06-06. The global financial ecosystem is undergoing a profound transformation, one driven by the accelerating convergence of artificial intelligence, fintech innovation, and data-powered public governance. Artificial Intelligence and Financial Transformation: Unlocking the Power of Fintech, Predictive Analytics, and Public Governance in the Next Era of Economic Intelligence explores this dynamic intersection where technology not only enhances operational efficiency but redefines how economies are managed, regulated, and empowered. In a world increasingly defined by digital transactions and decentralized finance, AI and predictive analytics are becoming indispensable tools for institutions seeking to navigate volatility, mitigate risk, and anticipate market behavior. Meanwhile, governments and regulatory bodies are leveraging intelligent technologies to design responsive policies, ensure transparency, and foster trust across the financial value chain. The rise of intelligent economic systems is not just a possibility; it is fast becoming a necessity. This book is designed for finance professionals, AI researchers, policy strategists, academics, and students eager to understand how digital intelligence is reshaping economic landscapes. It offers a multi-dimensional perspective on the evolution of financial services, featuring in-depth analyses of AI-enabled fintech applications, risk modeling frameworks, digital regulatory architectures, and governance mechanisms built on data-driven insights. The chapters herein blend theory and practice, spotlighting case studies from global financial hubs, innovations in central bank digital currencies (CBDCs), fraud detection algorithms, and real-time regulatory tech (RegTech). The ethical, legal, and social implications of these shifts are also critically examined, ensuring a balanced discourse on the promises and perils of algorithmic finance. As we step into a future where economic resilience and innovation go hand in hand, this book invites readers to reimagine finance not as a static system but as an intelligent, adaptive force for societal advancement.
