The Oxford Handbook of Cyberpsychology Alison

Attrill-Smith, Chris Fullwood, Melanie Keep, Daria J. Kuss, 2019-05-16 The internet is so central to everyday life that it is impossible to contemplate life without it. From finding romance to conducting business, receiving health advice, shopping, banking, and gaming, the internet opens up a world of possibilities to people across the globe. Yet for all its positive attributes, it is also an environment where we witness the very worst of human behaviour: cybercrime, election interference, fake news, and trolling, being just a few examples. What is it about this unique environment that can make people behave in ways they wouldn't contemplate in real life? Understanding the psychological processes underlying and influencing the thinking, interpretation, and behaviour associated with this online interconnectivity is the core premise of Cyberpsychology. The Oxford Handbook of Cyberpsychology explores a wide range of cyberpsychological processes and activities through the research and writings of some of the world's leading cyberpsychology experts. The book is divided into eight sections covering topics as varied as online research methods, self-presentation and impression management, technology across the lifespan, interaction and interactivity, online groups and communities, social media, health and technology, video gaming, and cybercrime and cybersecurity. The Oxford Handbook of Cyberpsychology will be important reading for those who have only recently discovered the discipline, as well as more seasoned cyberpsychology researchers and teachers.

Weblogs. A Critical Analysis of a New E-business Model Carina Schebitz, 2018-06-18

Bachelor Thesis from the year 2016 in the subject Business economics, Offline Marketing and Online Marketing, grade 2.0, University of Applied Sciences Essen, language English. Abstract: The primary function of this bachelor thesis is to connect the subject of E-Business models with the web 2.0 phenomenon of weblogs. Therefore, it is necessary to ascertain whether blogs can commercially perform as a characteristic of E-Business models. Furthermore, this paper should reveal what specific factors need to be considered and which challenges can occur when professionally operating a blog. Thus, the digital economics research, for example, the literature of Kollmann, Reynolds, or Wirtz, provides a broad base concerning the revenue models and the categorization of classical E-Businesses such as E-Commerce Websites. However, it does not scrutinize the particular requirements of weblogs. On the other hand, the relatively new body of literature about blogs focuses on the software and technological fundamentals, the specific characteristics, as well as the different characteristics. Moreover, in the year 2016, many professional bloggers exist that can make a living from their publishing occupation. This indicates that weblogs already represent a form of an E-Business model. However, the author does not know of published studies nor papers that have empirically investigated or described the business models of weblogs. In order to fill that void, the purpose of this bachelor thesis is to provide a systematical guideline from an economic perception in order to establish a weblog. It will include potential risk factors and particular requirements, as the following chapters will enumerate more clearly. Ultimately, this paper's aim is to serve potential future bloggers in gaining knowledge about factors they need to pay attention to from the beginning of their work, as well as marketers that

need to regard unwritten rules when it comes to working with influencers such as bloggers
