**Critical Journal ,1876      Sharing Economy** Ming Hu,2019-01-11 This edited book examines the challenges and

opportunities arising from today s sharing economy from an operations management perspective Individual chapter authors present state of the art research that examines the general impact of sharing economy on production and consumption the intermediary role of a sharing platform crowdsourcing management and context based operational problems Sharing economy refers to a market model that enables and facilitates the sharing of access to goods and services For example Uber allows riders to share a car Airbnb allows homeowners to share their extra rooms with renters Groupon crowdsources demands enabling customers to share the benefit of discounted goods and services whereas Kickstarter crowdsources funds enabling backers to fund a project jointly Unlike the classic supply chain settings in which a firm makes inventory and supply decisions in sharing economy supply is crowdsourced and can be modulated by a platform The matching supply with demand process in a sharing economy requires novel perspectives and tools to address challenges and identify opportunities The book is comprised of 20 chapters that are divided into four parts The first part explores the general impact of sharing economy on the production consumption and society The second part explores the intermediary role of a sharing platform that matches crowdsourced supply with demand The third part investigates the crowdsourcing management on a sharing platform and the fourth part is dedicated to context based operational problems of popular sharing economy applications While sharing economy is becoming omnipresence the operations management OM research community has begun to explore and examine different business models in the transportation healthcare financial accommodation and sourcing

sectors This book presents a collection of the state of the art research work conducted by a group of world leading OM researchers in this area Not only does this book cover a wide range of business models arising from the sharing economy but it also showcases different modeling frameworks and research methods that cannot be missed Ultimately this book is a tour de force informative and insightful Christopher S Tang Distinguished Professor and Edward Carter Chair in Business Administration UCLA Anderson School of Management

**Voices in the Code** David G. Robinson, 2022-09-08 Algorithms rules written into software shape key moments in our lives from who gets hired or admitted to a top public school to who should go to jail or receive scarce public benefits Such decisions are both technical and moral Today the logic of high stakes software is rarely open to scrutiny and central moral questions are often left for the technical experts to answer Policymakers and scholars are seeking better ways to share the moral decisionmaking within high stakes software exploring ideas like public participation transparency forecasting and algorithmic audits But there are few real examples of those techniques in use In Voices in the Code scholar David G Robinson tells the story of how one community built a life and death algorithm in an inclusive accountable way Between 2004 and 2014 a diverse group of patients surgeons clinicians data scientists public officials and advocates collaborated and compromised to build a new kidney transplant matching algorithm a system to offer donated kidneys to particular patients from the US national waiting list Drawing on interviews with key stakeholders unpublished archives and a wide scholarly literature Robinson shows how this new Kidney Allocation System emerged and evolved over time as participants gradually built a shared understanding both of what was possible and of what would be fair Robinson finds much to criticize but also much to admire in this story It ultimately illustrates both the promise and the limits of participation transparency forecasting and auditing of high stakes software The book's final chapter draws out lessons for the broader struggle to build technology in a democratic and accountable way

Marketing Ethics & Society Lynne Eagle, Stephan Dahl, 2015-09-15 Marketing while essential to organisational success is arguably one of the most controversial aspects of business management Criticisms of marketing's impact range from fostering materialism and unsustainable consumption patterns through to the use of deception stifling of innovation and lowering of quality to name but a few Taking a holistic and international perspective this book critically examines the ethical challenges marketing faces and explores strategies marketers can use to respond to those challenges The book examines specific aspects of marketing activities such as ethical considerations in relation to young consumers potentially harmful products and criticism of the societal impact of medical arts and tourism marketing activities It then

combines these with wider discussions of frameworks that enable marketers to respond to ethical challenges supplemented by discussions of cross cultural and international perspectives consumer responses and ethical consumption movements as well as shifting historical perceptions of marketing ethics The book is accompanied by a companion website including PowerPoint slides and teaching notes per chapter links to free SAGE journal articles and online videos selected per chapter by the authors quizzes per chapter and links to further reading online

Uberland Alex

Rosenblat,2018-10-23 Silicon Valley technology is transforming the way we work and Uber is leading the charge An American startup that promised to deliver entrepreneurship for the masses through its technology Uber instead built a new template for employment using algorithms and Internet platforms Upending our understanding of work in the digital age Uberland paints a future where any of us might be managed by a faceless boss The neutral language of technology masks the powerful influence algorithms have across the New Economy Uberland chronicles the stories of drivers in more than twenty five cities in the United States and Canada over four years shedding light on their working conditions and providing a window into how they feel behind the wheel The book also explores Uber's outsized influence around the world the billion dollar company is now influencing everything from debates about sexual harassment and transportation regulations to racial equality campaigns and labor rights initiatives Based on award winning technology ethnographer Alex Rosenblat's firsthand experience of riding over 5 000 miles with Uber drivers daily visits to online forums and face to face discussions with senior Uber employees Uberland goes beyond the headlines to reveal the complicated politics of popular technologies that are manipulating both workers and consumers

The Future of Unions and Worker Representation Anthony

Forsyth,2022-01-13 This book charts the path to revitalisation for trade unions in Australia the USA the UK and Italy It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism globalisation and hostility from employers and the state The study evaluates the responses of unions in each country to falling membership levels since the 1980s It considers the US organising model and its adoption in Australia and the UK comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia the Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers

**Quarterly** ,1919    2018 Sunset Review, Public Utilities Commission Colorado. Department of Regulatory Agencies. Office of Policy, Research, and Regulatory Reform,2018    Rethinking Consumer Protection Thomas Tacker,2019-07-15 For many decades consumer protection laws have focused on preventing bad choices Though that approach has some value this book explains we are much more often harmed even killed by the needless delay of new inventions that could save lives or vastly improve life quality Thomas Tacker explains how we can revamp regulation to embrace inventions that save and improve lives while still holding companies accountable for actions that harm consumers Case studies include price gouging the FDA approval process airport passenger screening and occupational licensing particularly as it relates to Uber This book demonstrates that enacting appropriate liability laws and providing information to guide consumers rather than strictly controlling their choices will save thousands of lives annually increase consumer freedom and make life more enjoyable
