Drayton, Meghan Pfister, 2012-10-12 Connected by a computer telecommunications network ninth graders from eight high  
schools scattered thousands of miles across Alaska work together building a robot submarine to gather samples from the  
floor of Prince William Sound This is high school science as some teachers and educational reformers today envision it  
centered on student projects that encourage learning by doing supported by modern technology enriched by collaboration  
among students and teachers both face to face and far apart This example is drawn from LabNet a three year effort funded  
by the National Science Foundation The project was conducted by Technical Education Research Centers TERC a nonprofit  
educational organization dedicated to improving mathematics and science education Eventually reaching 562 teachers in 37  
states Puerto Rico and American Samoa LabNet had a direct impact on their classroom practice In a follow up evaluation the  
majority said they had assigned their students more projects and had used LabNet s telecommunications network to  
exchange project ideas with other teachers This book is the story of LabNet as told by its editors with 14 additional essays on  
science projects both theoretical and practical by LabNet teachers and TERC staff      **Catalogue of Copyright Entries**
