**Measuring Classroom Products in Berkeley ...** Cyrus De Witt Mead, 1920

**Measuring Classroom Products in Berkeley, Vol. 1 of 2** Cyrus Dewitt Mead, 2015-07-12 Excerpt from Measuring Classroom Products in Berkeley Vol 1 of 2 Study Number 1 of the Bureau of Research in Education December 1 1920 Any program of administration or management which is concerned with securing efficient results with justifiable economy must be based upon reliable facts This is quite as true in the fields of finance and industry as in educational institutions Every up to date progressive business institution has its Department of Efficiency to which it looks for scientific evaluation of its efforts Upon the basis of these findings it modifies its programs of operation and procedure from time to time Realizing the need of definite information as to what was being accomplished in the public schools of Berkeley and being without a Department of Research at that time I sought the cooperation of the Department of Education at the University of California I found Dean Alexis F Lange and his associates in the department immediately interested to render service and to avail themselves of the laboratory opportunity thus provided Accordingly following two or three conferences I was able to report to the Board of Education at the regular meeting of October 1 1918 that tentative arrangements had been made with the faculty of the Education Department of the University of California for the direction by Dr Cyrus D Mead Associate Professor of Elementary Education of available graduate students in such research work in the public schools of Berkeley as would enable the determination of the results which were being secured in the public schools in the various grades and in the various subjects which might be investigated The board readily approved the arrangements made by the superintendent and empowered him to act fully in the matter and to print the results of the study for distribution when they were completed The results of this cooperative arrangement have been very satisfactory indeed as the published results in the following pages show Scientific studies were conducted to determine the results which were being secured in Writing Spelling Reading the Fundamentals of Arithmetic and Reasoning Ability in Arithmetic Before the second section is ready for publication it is hoped that it may be

possible to add an appendix dealing briefly with the results which are being secured in Composition and Geography The value to a school system of such an investigation as this is perhaps three fold About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
