Internet Memes and Copyright Law Brian Chun Lok Leung, 2025-09-30 This book explores the intricate relationship between copyright law and internet meme culture challenging an assumption that copyright is a barrier to digital creativity Using the lens of internet memes to analyse copyright law in the context of participatory remix culture the book confronts a common perception that copyright is the destroyer of internet memes on social media platforms Following the European Union's Copyright Directive widely known as the Meme Ban this book critically examines whether copyright might instead be reimagined to foster rather than inhibit re creations that define internet meme culture The book argues that this culture directly challenges copyright's core assumptions and proposes a new holistic approach to copyright that distinguishes between traditional and emergent forms of creative processes Arguing for a flexible interpretation of copyright that limits private proprietary rights in the case of internet memes it provides a legal framework to support socio cultural discourse without undermining copyright's foundational principles Covering core copyright concepts such as authorship idea expression originality fair dealing and user rights the book provides a compelling argument as to how copyright can adapt to the digital age as a protector of cultural expressions ensuring that internet memes are not only preserved but celebrated The book will be of interest to researchers in the field of copyright law the law of emerging technologies and intellectual property law

Solving the Evolutionary Puzzle of Human Cooperation

Glenn Barentin, 2021-03-25 In this book Glenn Barentin provides a new solution to a key question in the cognitive and

evolutionary study of religion why do humans cooperate What led humans uniquely among animals to have large scale civilizations with unprecedented cooperation One explanation propagated by the Big God Proponents BGP argues that a moralizing God is the crucial motivator for the pro social behaviour necessary for large scale civilization To explore this idea Barenthin provides a critical assessment of the evidence provided by the BGP and also discusses the place of God in our moral thinking However using evidence from anthropology history cognitive science psychology and game theory Barenthin presents a new theory that the evolutionary pressures faced by our forebears paved the way for emerging humans to engage in what he terms thin cooperation This type of cooperation requires individuals to comprehend the reasons for their actions and it is often done with others in mind Finally Barenthin argues that humans also have the capacity for thick cooperation which is made possible by those fighting for the rights of strangers in an attempt to make the world a fairer place for a greater number of people
