It is a universal condition that influences human decision-making at every level, from individual choices to the way we will allocate the resources of society. Its causes, effects, and implications for society.

Defining Scarcity: Scarcity arises from the limited nature of resources, including shortages of goods, services, and time, relative to the unlimited wants and needs of individuals. Causes of Scarcity: Scarcity can be caused by natural factors, such as limited land, water, and minerals, or by human actions, such as overpopulation, technological limitations, and inefficient resource allocation.
