Heuristics for Smart Energy Efficiency in Smart Cities Mustapha Hatti, 2021-11-24 This book emphasizes the role of micro
grid systems and connected networks for the strategic storage of energy through the use of information and communication
techniques big data the cloud and meta heuristics to support the greed for artificial intelligence techniques in data and the
implementation of global strategies to meet the challenges of the city in the broad sense The intelligent management of
renewable energy in the context of the energy transition requires the use of techniques and tools based on artificial
intelligence AI to overcome the challenges of the intermittence of resources and the cost of energy The advent of the smart
city makes an increased call for the integration of artificial intelligence and heuristics to meet the challenge of the increasing
migration of populations to the city in order to ensure food energy and environmental security of the citizen of the city and
his well being This book is intended for policymakers academics practitioners and students Several real cases are exposed
throughout the book to illustrate the concepts and methods of the networks and systems presented This book proposes the
development of new technological innovations mainly ICT the concept of Smart City appears as a means of achieving more
efficient and sustainable cities The overall goal of the book is to develop a comprehensive framework to help public and
private stakeholders make informed decisions on smart city investment strategies and develop skills for assessment and
prioritization including resolution of difficulties with deployment and reproducibility
