Ethical Practice in Operational Psychology Thomas J. Williams, Carrie H. Kennedy, 2011 In the late 1990s a number of psychologists who supported national security programs would meet monthly to collaboratively discuss program and research initiatives The need for psychologists to remain focused on a professional and ethical practice of psychology in support of national security operations was a frequent topic of those meetings Thus the meetings often served as professional peer consultations in a practice domain that has come to be known as operational psychology Various potential and real ethical conflicts related to the practice of psychology in support of national security missions were addressed in those meetings Many of those discussions serve as the foundational impetus for this book It also goes without saying that the dramatic increase in relevance and practice of operational psychologists in a post 9 11 world reinforces the need to bring that foundation into a structure of practice This volume is intended to help frame that structure and guide those operational psychologists who now face a vast array of complex challenges around the world It is our intention that this volume provide firsthand knowledge about the key areas of operational psychological practice and the ethical analysis needed to operate in this relatively uncharted territory Book PsycINFO Database Record c 2010 APA all rights reserved [Book Review Index](#), 2003 Vols 8 10 of the 1965 1984 master cumulation constitute a title index *Crisis Negotiators Field Guide* Michael G. Thomas Strentz,2013-03-01 The focus of this book is on dealing with hostage and crisis negotiations and how this can be successfully accomplished in order to save lives Typically those encountered by correctional and law enforcement crisis negotiators fall into one of three broad categories The Bad the Mad and the Sad or those with antisocial personality disorder those who are severely mentally ill insane or psychotic or those who are contemplating suicide respectively This book outlines tactics and procedures for dealing with these three groups of individuals Many excerpts will be found of siege dialogue and behind the scenes efforts of those in the command post and other locations whose efforts and energies play an integral role in this life saving process Some topics discussed include how using sleep deprivation should be avoided by hostage and crisis negotiators and how it can be used to advantage against the culprits and how active listening skills ALS can be utilized and the mechanics of the process These ALS guidelines show how being not only a good interviewer but also a good listener can be used to find a remedy to the situation Team roles and responsibilities are also discussed in some detail Using hooks or topics persons that can be used to extract the subject from the crisis and hot buttons or topics persons that should be avoided from discussion is also examined Several Lessons Learned sections are also included after the dialogues outlining what was learned and achieved in the process and which pitfalls should be avoided *Crisis negotiations* has also been included in the book because a growing number of subjects with whom crisis negotiators deal are not holding hostages While it is not the purpose of this text to review all tactics and techniques of the negotiations process many examples are provided of what does work and on occasion what does not It will prove to be a very useful tool to corrections and police negotiators and crisis interveners who seek peaceful ends to these very volatile and dangerous situations **Crisis**
