**On the Teaching of Linear Algebra** J.-L. Dorier,2000-09-30 This book presents the state of the art research on the teaching and learning of linear algebra in the first year of university in an international perspective It provides university teachers in charge of linear algebra courses with a wide range of information from works including theoretical and experimental issues

**Challenges and Strategies in Teaching Linear Algebra** Sepideh Stewart,Christine Andrews-Larson,Avi Berman,Michelle Zandieh,2018-02-01 This book originated from a Discussion Group Teaching Linear Algebra that was held at the 13th International Conference on Mathematics Education ICME 13 The aim was to consider and highlight current efforts regarding research and instruction on teaching and learning linear algebra from around the world and to spark new collaborations As the outcome of the two day discussion at ICME 13 this book focuses on the pedagogy of linear algebra with a particular emphasis on tasks that are productive for learning The main themes addressed include theoretical perspectives on the teaching and learning of linear algebra empirical analyses related to learning particular content in linear algebra the use of technology and dynamic geometry software and pedagogical discussions of challenging linear algebra tasks Drawing on the expertise of mathematics education researchers and research mathematicians with experience in teaching linear algebra this book gathers work from nine countries Austria Germany Israel Ireland Mexico Slovenia Turkey the USA and Zimbabwe

**Using the Mathematics Literature** Kristine K. Fowler,2004-05-25 This reference serves as a reader friendly guide to every basic tool and skill required in the mathematical library and helps mathematicians find resources in any format in the mathematics literature It lists a wide range of standard texts journals review articles newsgroups and Internet and database tools for every major subfield in mathematics

**Encountering Algebra** Cecilia Kilhamn,Roger Säljö,2019-07-03 The book reports a comparative research project about algebra teaching and learning in four countries Algebra is a central topic of learning across the world and it is well known that it represents a hurdle for many students The book presents analyses built on extensive video recordings of classrooms documenting the first introduction to symbolic algebra students aged 12 to 14 While the content addressed in all classrooms is variables expressions and equations the teaching approaches are diverse The chapters bring the reader into different algebra classrooms discussing issues such as mathematization and social norms the role of mediating tools and designed examples and teacher beliefs By comparing classrooms new insights are generated about how students understand the algebraic content how teachers instruct and how both parties deal with difficulties in learning elementary algebra The book also describes a research methodology using video in search of taken for granted aspects of algebra lessons

**In Search of a Pedagogy of Conflict and Dialogue for Mathematics Education** Renuka Vithal,2003-09-30 This book is of interest to mathematics educators researchers in mathematics education gender social justice equity and democracy in education and practitioners teachers interested in the use of project work in mathematics teaching and learning The book builds theoretical

ideas from a careful substantial description of practice in the attempt to improve both theory and practice in mathematics education It thus interrogates and develops theoretical research tools for mathematics education and provides ideas for practice in mathematics classrooms **Humans-with-Media and the Reorganization of Mathematical Thinking**

Marcelo C. Borba,Monica E. Villarreal,2005-07-25 As we enter into the 21Century the presence of technology particularly techno science in everyday life is overwhelming Institutions in the modem world are affected by this presence Like Janus the ancient Roman god whose double faced head signified his knowledge of the present and the future education has always been a two faced enterprise The past establishes goals and methods of Education and the other face tries to capture the future and suggests and proposes new directions of thought and new styles of behavior for the generation which in a few years will take over both routines and societal innovation History tells us that this face of Education has always been sensitive to emerging technologies Technologies of communication and information have been particularly influential in new directions of society in particular of education The transition from orality to writing marked a new role for the teacher From the sole repository of accumulated knowledge the teacher became a guide and interpreter of registered knowledge The emergence of hardware in the form of documents and books initiated a companionship between teacher and hardware It is also remarkable how the emergence of writing strengthened individual memory contrary to the concerns of Thamus when Theuth explained to him the discovery of writing The conservative king was afraid that the new invention would implant forgetfulness in the souls of men **Symbolizing, Modeling and Tool Use in Mathematics Education** K.P

Gravemeijer,R. Lehrer,H.J. van Oers,Lieven Verschaffel,2013-03-09 The almost universal rejection of the notion of symbols as carriers of meaning has created the need to find an alternative for the use of models as embodiments of mathematical concepts By taking its point of departure as a concern for the way students actually use tools and symbols and for what these signify for them this book explores the option of building on symbolizing modelling and tool use as personally meaningful activities of students This theme is approached from different angles and different perspectives One dimension is that of setting varying from the study of informal spontaneous activity of students to an explicit focus on instructional design and goals and effects of instruction Another dimension is the theoretical framework of the researcher varying from constructivism to activity theory cognitive psychology and instructional design theory This book will appeal to a wide audience varying from researchers instructional designers educators and graduate students **Journal for Research in Mathematics Education**

,2013 **Geometry in the Mathematics Curriculum** National Council of Teachers of Mathematics,1973

**Mathematics Education in the Digital Age** Alison Clark-Wilson,Ana Donevska-Todorova,Eleonora Faggiano,Jana Trgalová,Hans-Georg Weigand,2021-05-24 The wide availability of digital educational resources for mathematics teaching and learning is indisputable with some notable genres of technologies having evolved such as graphing calculators dynamic graphing dynamic geometry and data visualization tools But what does this mean for teachers of mathematics and how do

their roles evolve within this digital landscape This essential book offers an international perspective to help bridge theory and practice including coverage of networking theories curriculum design task implementation online resources and assessment Mathematics Education in the Digital Age details the impacts this digital age has and will continue to have on the parallel aspects of learning and teaching mathematics within formal education systems and settings Written by a group of international authors the chapters address the following themes Mathematics teacher education and professional development Mathematics curriculum development and task design The assessment of mathematics Theoretical perspectives and methodologies approaches for researching mathematics education in the digital age This book highlights not only the complex nature of the field but also the advancements in theoretical and practical knowledge that is enabling the mathematics education community to continue to learn in this increasingly digital age It is an essential read for all mathematics teacher educators and master teachers
