Pattern-Oriented Software Architecture, Patterns for Concurrent and Networked Objects Douglas C. Schmidt, Michael Stal, Hans Rohnert, Frank Buschmann, 2013-04-22 Designing application and middleware software to run in concurrent and networked environments is a significant challenge to software developers The patterns catalogued in this second volume of Pattern Oriented Software Architectures POSA form the basis of a pattern language that addresses issues associated with concurrency and networking The book presents 17 interrelated patterns ranging from idioms through architectural designs They cover core elements of building concurrent and network systems service access and configuration event handling synchronization and concurrency All patterns present extensive examples and known uses in multiple programming languages including C C and Java The book can be used to tackle specific software development problems or read from cover to cover to provide a fundamental understanding of the best practices for constructing concurrent and networked applications and middleware About the Authors This book has been written by the award winning team responsible for the first POSA volume A System of Patterns joined in this volume by Douglas C Schmidt from University of California Irvine UCI USA Visit our Web Page

Statsnotes: Some Statistics For Management Problems Alan Jessop, 2016-03-17 Managers need access to some statistical advice from time to time to help in solving business problems Students need access to statistical methods to support work in non statistics courses case studies and projects What is needed will depend on the demands of the problem and how much statistics the manager or student already knows The requirement is for flexible decision support This unique book presents statistical ideas and models in easily accessible form describing both methods and issues of application statsNotes are organized as a set of over one hundred notes rather than as a number of chapters This enables managers and students to locate just what they need for the problem they have Each note consists of a description of what to do an example the rationale links to other notes Managers and students can choose to use as many notes as necessary which might be just one note or a set of linked notes Deciding which method will be helpful depends not just on finding an appropriate statistical method but on the business context too statsNotes provide advice at three levels While the range of topics covered is similar to those in introductory textbooks and courses the focus is on management decision and the methods for dealing with risky decisions and management judgment in this book are usually found in more specialist texts

Proceedings of the 6th European Conference on Pattern Languages of Programs, 2001 Andreas Rüping, 2002 *Coordination Models and Languages* Wolfgang De Meuter, Grăia-Catalin Roman, 2011-06-07 This book constitutes the refereed proceedings of the 13th International Conference on Coordination Models and Languages COORDINATION 2011 held in Reykjavik Iceland in June 2011 as one of the DisCoTec 2011 events The 14 revised full papers presented were carefully reviewed and selected from 35 submissions The conference focuses on the design and implementation of models that allow compositional construction of large scale concurrent and distributed systems including

both practical and foundational models run time systems and related verification and analysis techniques *Proceedings of the 7th European Conference on Pattern Languages of Programs, 2002* Alan O'Callaghan, 2003 The Pattern Almanac 2000 Linda Rising, 2000 The Pattern Almanac brings together key information about hundreds of the world's most widely used patterns and catalogs all the stages, resources and templates of pattern development. Coverage includes analysis architecture business planning class libraries client server development concurrency databases design distributed systems memory management networking and more. Both stand alone patterns and sub patterns are covered Implementing Application Frameworks Mohamed E. Fayad, Douglas C. Schmidt, 1999-10-11 Object Technology A gold mine of enterprise application frameworks Implementing Application Frameworks While frameworks can save your company millions in development costs over time the initial investment can be quite high. This book CD ROM package helps you to reduce the cost of framework development by providing 40 case studies documenting the experiences of framework builders and users at major corporations and research labs worldwide. Throughout the authors extract important lessons and highlight technical and organizational implementation practices that have been proven to yield the biggest payoff. Focusing primarily on business systems and agent based application frameworks it covers frameworks for Data processing Agent based applications Artificial intelligence applications Object oriented business processes System application frameworks Programming languages and tools And much more.
