International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there's still a deep discrepancy between the

level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society The SENCO Survival Guide Sylvia Edwards,2010-12-14 Are you confused about Special Education Needs SEN and Learning Difficulties and Disabilities LDD Are you unclear about how to identify and address the needs of your pupils in the context of the new Inclusion Development Programme Do you need support to develop a great system that links together recent initiatives and government legislation This book is intended for SENCOs and other staff working from the Foundation stage to Key Stage 4 with management responsibility for SEN LDD systems in schools The book will explore recent initiatives and terminology in the context of the Inclusion Development Programme and Narrowing the Gap examine the implications for school policy and practice link together related SEN LDD development help schools to develop co ordinated systems that enable all learners with SEN LDD to meet their potential and aspirations Understanding Dyscalculia and Numeracy Difficulties Jane Emerson,Patricia Babbie,2015-07-21 A complete accessible guide to understanding dyscalculia and low numeracy this book covers number sense and how the brain deals with numbers assessment planning intervention what to teach how to teach it and how parents can help Essential for parents teachers and education professionals working with a child with numerical difficulties
