Visit to the zoo

I recently went on a visit to the zoo, and it was so much fun! I saw all sorts of amazing animals, including lions, giraffes, and monkeys. My favorite part was seeing the elephants, because they were so big and majestic. I also got to see a baby elephant, and it was so cute and playful. I also saw some flamingos, and they were so colorful and graceful. The zoo was a great place to learn about all the different animals and see them up close. I can't wait to go back and see even more amazing creatures.

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations. Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism or aphasia, it may also assist the communication needs of a wider audience such as healthcare professionals, aid workers, military personnel, travellers or parents and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike.

Elley, 1992 This booklet focuses on the reading literacy test scores of students in the grade levels where most 9 and 14 year olds were to be found in 32 systems of education. It describes the achievement levels of carefully selected probability samples of students in three domains of reading literacy and makes some preliminary interpretations of these results. The comparisons made in the test scores require the reader to assume that the tests were equally fair for all countries that the tests were properly translated and administered and that the student samples were comparable in age, in test motivation and in their approach to test taking. Much effort was taken to ensure and to check on these possible influences. Where differences were still found to exist for instance in mean ages, comments have been made in the text and adjustments to the scores have been attempted.
