**The home security company "Ring". Entry in the market of western Europe** Eric Carstensen, 2022-02-09 Seminar paper from the year 2020 in the subject Business economics Offline Marketing and Online Marketing grade 3 AFUM Akademie f r Unternehmensmanagement GmbH language English abstract This coursework will take a closer look at the company Ring Ring was founded in 2012 by Jamie Siminoff The company manufactures security

technology and continues to expand more and more worldwide The prices of the products are low and it is suitable for every household In order to compete even more in the global market this paper will show in which countries the company will be distributed next The focus is on the western European market where four countries are selected in which Ring is expanding its market First the company Ring is described in more detail including which products are sold how much the company is worth and whether it has already helped against burglaries The next step is to look at which countries in Western Europe should start selling security products taking into account the crime rate and the rate of burglaries and thefts After that potential companies are considered who can sell Ring s security products in order to make the highest possible profit and enter the market on a large scale For this purpose the largest possible companies and supermarkets are looked at so that as many customers as possible can buy the products Finally a short conclusion will be given on how Ring can proceed to enter the four countries as quickly and precisely as possible in order to spread more and more in Western Europe

**Deconstructing Digital Capitalism and the Smart Society** Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future *The South American*
