*Eureka Math Curriculum Study Guide* Common Core, 2015-03-23 Eureka Math is a comprehensive content rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year information on alignment to the instructional shifts and the standards design of curricular components approaches to differentiated instruction and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade 4 provides an overview of all of the Grade 4 modules including Place Value, Rounding and Algorithms for Addition and Subtraction, Unit Conversions and Problem Solving with Metric Measurement, Multi-Digit Multiplication and Division, Angle Measure and Plane Figures, Fraction Equivalence, Ordering and Operations, Decimal Fractions, and Exploring Measurement with Multiplication.

*Uncomplicating Fractions to Meet Common Core Standards in Math, K-7* Marian Small, 2014 The Common Core State Standards for Mathematics challenges students to become mathematical thinkers not just mathematical doers. In her new resource, professional developer Marian Small shows teachers how to uncomplicate the teaching of fractions by focusing on the most important fraction ideas that students need to grasp. The book is organized by grade level beginning with Grade 1 where the first relevant standard is found in the geometry domain and ending with Grade 7 where the focus is on operations with rational numbers and proportional thinking.

**Making Black Girls Count in Math Education** Nicole M. Joseph, 2022-08-16 Making Black Girls Count in Math Education explores the experiences of Black girls and women in mathematics from preschool to graduate school, deftly probing race and gender inequity in STEM fields. Nicole M. Joseph investigates factors that contribute to the glaring underrepresentation of Black female students in the mathematics pipeline. Joseph's unflinching account calls attention to educational structures and practices that contribute to race and gender-based stratification in science, technology, engineering, and mathematics disciplines. The author also disentangles a complex network of historical and sociopolitical elements that influence the perception and experiences of Black girls and women both inside and outside of mathematics education. In her clear-eyed assessment of the intersectional difficulties facing this marginalized

group Joseph offers a critical view of the existing mathematics education research practice and policies that have neglected Black girls and women confronts the problematic history of mathematics education policy and considers imbalances in the current teacher workforce in US mathematics programs She then provides practical actionable suggestions for reform Joseph invites students families and educators as well as researchers policy makers and other relevant stakeholders to disrupt systems structures and ideologies She calls for an end to racism and sexism in many areas of mathematics education including learning environments curriculum design and implementation and testing and assessments An essential read for anyone concerned about supporting the mathematical learning and development of Black girls and women this work advocates for coalition building so that greater more equitable opportunities for learning and engagement may be offered to Black female students
