### **Methods for the Economic Evaluation of Health Care Programmes ,1997**

**Economic Evaluation in Health Care** Michael Drummond,M. F. Drummond,Alistair McGuire,2001 To accompany the hugely successful Methods for

Economic Evaluation of Health Care Programmes 2e this book is a thorough and rigorous discussion of the methodological principles and recent advances in the rapidly advancing field of theory and practice of economic evaluation in health care

Written by an internationally acclaimed group of authors the book provides an in depth discussion of the latest theoretical advances and gives comprehensive reviews of the available literature The book covers the main areas of economic evaluation including the methods for measuring costs and outcomes the collection of data alongside clinical studies ways of handling uncertainty discounting and issues relating to the transferability of economic data

### **Theory and Methods of Economic Evaluation of Health Care**

Magnus Johannesson,1996-05-31 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost benefit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to try and provide a coherent framework within cost benefit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O Connor and four anonymous referees provided helpful comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid

### **Methods for the Economic Evaluation of Health Care Programmes**

M. F. Drummond,2005 Standard textbook in the field Clearly written in a style accessible to a wide readership with extensive references and boxes to highlight key issues Suitable for both students and practitioners

### **Methods for the Economic Evaluation of Health Care Programmes**

### **Essentials of Economic Evaluation in Healthcare**

Rachel Elliott,Katherine Payne,2005 This book is an introduction to economic evaluation for those with little or no knowledge of economics or health economics Essentials of Economic Evaluation in Healthcare gives an overview of economic issues specific to healthcare and describes the main types of economic evaluation cost effectiveness cost utility and cost benefit analysis The use of decision analysis to design and carry out economic evaluations is discussed Preferred statistical methods for handling costs current approaches to dealing with uncertainty and quantifying patient preferences using discrete choice experiments are explained Each chapter contains worked examples and questions With increasing pressure on national healthcare budgets all healthcare professionals should have a basic understanding of the finite nature of healthcare resources and the need to make choices between treatments based on a cost benefit comparison This book will be invaluable to pharmacists and pharmacy students as well as to other healthcare professionals researchers and managers publisher website

### **Economic Evaluation in Healthcare**

Gordon Mallarkey,1999 The purpose of economic evaluations in healthcare is to affect decision making So how do you determine the

best use of scarce resources in terms of benefits gained from expenditures The purpose of this book is to review the methods of economic evaluation and how they may be used optimally and with practical results It includes review articles on familiar analytical tools opinion papers on areas of contention and guidelines on how to apply and analyse economics tools methods and models **Decision Modelling for Health Economic Evaluation** Andrew Briggs,Mark Sculpher,Karl Claxton,2006-08-18 In financially constrained health systems across the world increasing emphasis is being placed on the ability to demonstrate that health care interventions are not only effective but also cost effective This book deals with decision modelling techniques that can be used to estimate the value for money of various interventions including medical devices surgical procedures diagnostic technologies and pharmaceuticals Particular emphasis is placed on the importance of the appropriate representation of uncertainty in the evaluative process and the implication this uncertainty has for decision making and the need for future research This highly practical guide takes the reader through the key principles and approaches of modelling techniques It begins with the basics of constructing different forms of the model the population of the model with input parameter estimates analysis of the results and progression to the holistic view of models as a valuable tool for informing future research exercises Case studies and exercises are supported with online templates and solutions

This book will help analysts understand the contribution of decision analytic modelling to the evaluation of health care programmes **ABOUT THE SERIES** Economic evaluation of health interventions is a growing specialist field and this series of practical handbooks will tackle in depth topics superficially addressed in more general health economics books Each volume will include illustrative material case histories and worked examples to encourage the reader to apply the methods discussed with supporting material provided online This series is aimed at health economists in academia the pharmaceutical industry and the health sector those on advanced health economics courses and health researchers in associated fields

**Cost Effectiveness Modelling for Health Technology Assessment** Richard Edlin,Christopher McCabe,Claire Hulme,Peter Hall,Judy Wright,2015-08-11 This book provides an introduction to decision analytic cost effectiveness modelling giving the theoretical and practical knowledge required to design and implement analyses that meet the methodological standards of health technology assessment organisations The book guides you through building a decision tree and Markov model and importantly shows how the results of cost effectiveness analyses are interpreted Given the complex nature of cost effectiveness modelling and the often unfamiliar language that runs alongside it we wanted to make this book as accessible as possible whilst still providing a comprehensive in depth practical guide that reflects the state of the art that includes the most recent developments in cost effectiveness modelling Although the nature of cost effectiveness modelling means that some parts are inevitably quite technical across the 13 chapters we have broken down explanations of theory and methods into bite sized pieces that you can work through at your own pace we have provided explanations of terms and methods as we use them Importantly the exercises and online workbooks allow you to test your skills and understanding as you go along

**The Economic Evaluation of Mental Health Care** Martin R. J. Knapp,1995 This work analyzes the economics of mental health care covering areas such as cost analysis methods estimating costs evaluation of psychiatric reprocessing comparative equity on community based care reduced list costing decision analysis and an evaluation of costs from 1860 to 1986
